They are not the places that make good men bad, but the places that make good men bad, but the places where bad men congregate. In short, they are but the sewer pipes and privy vaults of the moral world. And can it not be seen that to close them up would be, to morals, as disastrous as to health if the sewer pipes of a great city were closed? What We Eat.

Is intended to neurish and sestain us, but it must be digested and assimilated before it can do this. In other wores, the neurishment contained in food must be seperated by the digestive organs from the waste materials and must be carried by the bloed to all parts of the body. We believe the reason for the great benefit which so many people derive from Hood's Sarsenparilla line in it his fact that this medicine gives good digestion and makes pure, rich blood. It restores the functions of those organs which convert food into neurishment that give strength to nerves and muscles. It also cares dyspepsia, scrotia, salt rheum, boits, sores, pimples and eruptions catarrh, rheimatism and all diseases that have their origin in impure blood. Ainister's Mistake.
