Crop Prospects.

SALEM, June 1st .- All grain crops in this section will be fully 100 per cent from present outlook. The apple crap continues to be an open question, with indications that there will be few if any for export, if indeed there are enough for home use.

The prune crop in the Willamette valley is being improved by threaing and while the Italian prune thins itself, but few of the petite prone orchards will require artificial depletion. In some or-chards of the latter whole branches are being removed to make room for a large average yield of fruit. Many of the petite prune orchards will have barely enough fruit to may for picking, especially
where they here heavily hast year. The
cherry crop does not promise so well as
a week aga, a very hot sure last Saturday having scalded a great many of the
sarly varieties and caused them to fall
off.

sarly varieties and caused them to fail off.

Rosenuro, June 1st.—This will be a grand year for crops in a l parts of the county. The grain is showing up fine, hops promise a big yield, and the weather thus far has been equally favorable toward fruit, especially strawberries, cherries and prunes, the latter being largest in the Italian variety while silvers and petites are about an average. Peaches are not giving much promise of a large yield, and the farmers are trimming their orchards to give the trees a fresh start for next year. Apples and pears will be about the same as last season's output.

pears will be about the same as last season's output.

Live stock deserves special mention
because of their unusually fine appearance, and demand for beef cattle brings
a good figure. An agent of the Union
Meat Company, Portland, has been in
the vicinity for the tast two weeks purchasing cattle for his firm, and several
carloads of large fat beef bave been
shipped as the result of his labors.
Other shipments of an individual character have added to the prosperous record of this year's sales of Douglas county livestock. The Angora goat industry
is receiving considerable attentiob, sevgraf flocks bearing evidence of the rapid
growth of a business only two years old.
