Notes on the Flower Mission Work.

The Flower Mission is a regularly organized, systematized all-the-year-round work of the W. C. T. U. The department has been adopted by 57 state divisions also in Alaska, Cuba, Porto Rico and Manila. We quote a few interesting items from the report of the National Superintendent:

336 meetings have been devoted principally or entirely to the Flower Mission. 105,232 pages of literature have been distributed. By request or to fill orders literature has been sent to Mexico, Canada, Manila, Porto Rico, Cuba, the Faris Exposition, England and Norway. 408,920 bouquets are reported distributed, this is probably far below the actual number, 5,565 growing plants have been carried gladness to other lives, 121,963 visits have been made to the sick, poor and afflicted, 1,194 drives and other outings given to invalids. In all the states public institutions are visited at regular intervals. 7,362 visits have been made and a large number of services held in connection with them.

Many persons have been led to feel the touch of God's love through the "ministry of flowers."

More than 3,000 total abstinence pledges have been signed this year through the influence of the Flower Mission department.

Thousands of donations are reported, including food, ice, fuel, household articles and comforts for the sick, 35,492 garments, 9,313 glasses of jelly and preserved fruits have been distributed. Linn has been kept for loaning in cases of illness. Washing and sewing have been done. Days and hours have been spent in reading, singing and caring for the sick. Letters have been written, employment found for those in need, the sick have been sent to the country and seashore, funeral expenses have been paid and graves decorated.

The Central W. C. T. U. will devote the session tomorrow to the interests of this work. Friends donating loose flowers are requested to send them to the W. C. T. U. hall in the forenoon. They may bring bouquets with them in the afternoon at 2:30.

THE FREE FERRY.—The Gazette says: The Free Ferry has proved a great convenience in many ways. Mr. Metcumb, who lives in Oakville, Linn county, related on the street a few years ago that a great deal of milk is now coming to the Corvallis creamery from the vicinity of Oakville. He hauls the milk for his neighbors, along with his own, to the creamery and those he hauls for pay him 10 cents per hundred weight for hauling. In this manner about 1,400 pounds of milk reach the creamery every day from Oakville. Mr. Metcumb stated that a great part of this milk would not come here, if it were not for the fact that a free ferry system had been established. They have been hauling milk to the creamery of Corvallis now for a month. Saturday, when Mr. Metcumb started for his home across the Willamette, he had checks on the First National Bank of this city for \$380, which he was taking back to distribute among his neighbors in payment of the milk sent to Corvallis during the month. Government Crop Report.

The week has been cloudy and showery, but the unseasonably cool weather, with freezing temperatures and general frosts, have been its most marked features. Temperatures several degrees below freezing point occurred Wednesday and Sunday mornings in eastern Oregon. Warm, sunny weather is badly needed in all parts of the state, but it is fortunate that no sudden change to warmer took place right after the frosts, as such changes would have added much to the damage already done, and it is believed that the losses will be much less than anticipated because of the following cool weather. Severe frosts occurred in Wasco, Sherman, Morrow, Wallowa, Union, Umatilla, Grant, Baker, Harney and Malheur counties. Correspondents in the wheat districts report that the frost there was very streaky and the greatest damage was done on low ground. A small amount of fall wheat that had started to head has been injured, but to what extent cannot yet be determined. Spring wheat has not been harmed, and the total amount of damage to the wheat crop will probably be very small. Grass in all sections of the state is now remarkably free from insect pests, and is generally in a thrifty and promising condition. Hops are doing well, but high winds in some localities have caused considerable extra work in connection with the training of the vines. Gardens and corn are making a slow growth on account of the cold weather, and in the eastern portion of the state many vegetables were cut to the ground by the frosts and will prove a total loss. A good hay crop is now assured and pastures in abundance doing fairly well in the western section of the state, and complaints of tree fruit dropping are, on the whole, rather less than usual at this season of the year. In the eastern portion of the state the frosts have damaged fruit of all kinds, and there will be a considerable shortage from the yields formerly expected, but definite information regarding the amount of this short age can not be told.
