This is the gossiping season of the year. Never talk until you know what you are talking about. Character is too valuable property to be lost through false reports.

As soon as the driver sees the disposition to run, in the horse he is driving, let him begin the rapid jerking first on one side and then the other, not gently, but with such force as to bring the bridle-bit from one side to the other through the horse's mouth. This motion so confuses the animal that all other fear is taken away. From many years' driving I have never found this method to fail on the most refractory horse. Of course, you should never drive any horse without the best of strong leather that will stand any strain you need to put on it.—Farm and Fireside.
