## Judge Swayne's Acquittal.

Judge Swayne showed himself guilty of gross incompetency, according to the U. S. Senate, but the charges against him were too trivial for consideration, and if he were convicted other judges who have been doing the same thing might also be convicted. If they handle the money of the people dishonestly they ought to be convicted if it is every last one of them. A government official should be made to use the money for his expenses as carefully as if for his own business whether the amount is small or great. The indications are that Judge Swayne was grafting the people out of several dollars a day, \$5 or \$10 right along, on his expense account, but it was too trivial a matter for the senate to think about. Made up of a body of grafters it is only natural that they should stand in with Swayne and every other grafter in the country when opportunity offers. Hence their action is not surprising. There is a class of people in the country who seem to think it is all right to cheat the government whenever a chance is thrown in one's way, from a small city government to the national government. But it is no more right to take what doesn't belong to one from a public body than it is from a fellow citizen, and it doesn't take the brains of a U. S. Senator to figure the fact out.

The Ladies' Home Journal boasts that it is not as much of an advertising medium as it has been accused of by some, and gives the figures to show that it does not publish as many inches of advertisements as many of the big magazines, the list showing its name at the bottom of about a dozen given. This is rather of a remarkable boast in this age when the big papers and the magazines are filled with brag of directly the opposite kind. As a matter of fact these are things that should be kept out of the papers. The big elephant sheets of the country are really in small business when they give figures showing more inches of business in their columns than in other papers, naming them. There is no more reason for papers to be personal than there is for merchants, or doctors or lawyers, and they go outside the province of the press when they are so.

Portland will be fortunate if it gets rid of all its bosses. Bosses are contemptible individuals, who assume rights and authority that belong to the people, lawlessly running things no more their business than that of any one else. So called bosses ought to be shunned by all respectable men. A man with a spark of manhood ought to rise above any one telling him how to act in matters of politics. It is a disgrace that one man can name candidates and dictate policies. Down on the boss spirit in the hamlet of a dozen houses to the biggest city in the country.

Political machines of whatever nature or character, everywhere, should be smashed. There are smaller places than Portland in Oregon with machines, and they cannot be gotten rid of by the people any too fast. Whenever you see a machine, or ring, or whatever you wish to call it, putting in an appearance, it is a good idea to be against it. It is in politics what the trust is in business, and cannot be punctured any too fast.

Governor Boutwell, who died in Massachusetts this week, had some strong points in his character. One was not to swallow everything because it was a part of the policy of his party, no matter how wrong. Such men stand out above the horizon.

When Mayor Williams retires the people of Portland will be congratulated by thousands of people all over Oregon.

Governor Chamberlain is the man of the hour in Oregon.

## \$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials Address: F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

## The Best Physic

When you want a physic that is mild and gentle, easy to take and certain to act, always use Chamberlain's Stomach and Liver Tablets. For sale by Foshay & Mason.

Dr. Wood's Norway Pine Syrup seems especially adapted to the needs of the children. Pleasant to take; soothing in its influence; it is the remedy of all remedies for every form of throat and lung disease.

## Portland Doings.

PORTLAND, Mar. 1.—With the adjournment of the grand jury and the legislature United States Marshal W. F. Matthews, republican boss of Portland has become the storm center of local politics. Serious charges have been filed against Matthews with the President which may lead to his removal.

Among the affidavits filed are those accusing him of taking an active part in city, county and state politics while holding a federal office. During the session of the legislature Matthews wrote many personal letters to members requesting them to vote for certain bills. Many of these letters have been collected and sent to Washington with the affidavits alleging partisan politics.

Another affidavit contains a more serious charge, that of tampering with the United States mails. It is alleged that Matthews while Assistant Postmaster of Portland secretly opened in the Portland postoffice the mail of Senator Simon with the object of finding out the plans of the Simon faction.

The story is current that Matthews sent in his resignation but it was refused pending investigation.

It is a well known fact that United States District Attorney Heney has regarded Matthews with distrust and that during the progress of the land fraud trials there was more than one occasion that this distrust found expression. Matthews owes his present office to Senator Mitchell, and the experience of the government in the Sorenson trial when two of the jurors were fixed in the interest of the defendant has aroused the determination to take no chances in the still more important trials coming next June. While the drawing of jurors in federal court is not in the hands of the Marshal he is present when the names are drawn and has opportunity to learn in advance of the trial the names and addresses of men from whom the jury will be selected. Such information could be used to thwart the prosecution.

A smelter combine is being engineered by New York interests which is intended to embrace the principal plants of the Pacific Northwest. B. M. Baruch, of New York who is said to have the American Smelting and Refining Company interests is negotiating for the different plants.

F. W. Bradley, the mining engineer and a large stockholder in the Tacoma smelter, but states that the men in the negotiation did not represent the American Smelting and Refining Company. The plant supposed to be desired are the two Puget Sound smelters, the Trail and Boundary smelters of British Columbia, the one being built on the Sullivan mine in British Columbia, the Sumpter plant and the

## Keswick smelter.

An ordinance was introduced into the city council today authorizing the mayor to grant pardons and suspend and commute sentences of prisoners after conviction in the municipal court for violations of city ordinances.

The object of the ordinance is to relieve the crowded condition of the city jail. Two or three inmates occupy every cell and at times half a dozen have to share the same room.

"This ordinance is desired" said Mayor Williams, "to rid the city of undesirable characters. If they promise to leave the city and not return they may be pardoned. I believe this is the only way we can solve the problem."

One Dr. William Osler, of John Hopkins University, is making a donkey of himself by advocating the retirement of men from business at the age of forty. Every few days these big brained fellows jump up and make fools of themselves by advocating some freak theory with nothing to it. As a matter of fact men are at their best after the age of forty, most of them between fifty and sixty, but the fact is not very material one way or the other. It is something that seeks its own level, and takes care of itself. It's a free country and men will and should work as long as they wish, and most men feel better for it. The do-nothing life is worst of all.

## New Goods.
