The Forest Fires.

Reports last evening from the front by those coming down on the train were that the fires were about out, a good sized rain helping materially.

One man who has been to the front several times declares that outside of the damage to settlers and the burning of Turnidge's bark near Berry he does not believe \$300 damage was done to the green timber, probably too low, but showing how the extent of the fire has been exaggerated. Considerable has been in burnt over districts and those logged, or were in the green timber along the underbrush. One man declared that it did his place a good deal more good than harm, burning up all the brush.

Several settlers were burned out, campers disturbed and such a big fire is altogether a menace and certainly undesirable, had enough without the exaggeration given it.
