Nowhere in the country, it is said, are there so many fire proof dwelling houses in one group. The scheme is the result of the study of improved methods of construction within the las few years.

The heirs of the Henry A Page estate are carrying through the undertaking. One of the Page heirs who has been interested, for several years, in developing the properties of the estate, formerly put up houses of re-enforced concrete. Recently he retained un engineer to make a special investigation of fire proof materials and buildng methods for the purpose of comparison. The consequence of the investigation was that terra cotta blocks. instead of concrete, were chosen for the Jersey dwellings. Squires and Wynkooop and Rossiter and Wright are the architects.

Each of these houses now being built at Mountain Station has eight or ten rooms. All partitions, as well as the floors and outride walls, are of terra cotta, so that a fire could not spread from one room to another. In one of the houses is a floor with a span of the farmers along the river, eighteen reet, the longest span ever made with this type of construction.

#### Albany as an Apple Cent r.

The people of Albany are glad to have with them their hustling neighbors of the commercial world from Portland, Eugene and Corrallis, and latter from Salem, members of the same commonwealth, in the same red streak of progress. It is a big thing for Albany to secure an apple reputation; but it is a greater thing for the entire valley. First-class apple orchards, of high grade, run in a modern way, will do more for this valley than almost any other thing. Apples often make a country. The king of fruit, when properly raised and packed they are great sellers all over the world.

The display here shows that this valley can raise apples with any place in the world, net excepting anv. And yet apple raising is not yet seriously developed here. Producers have not begun to go to the pains to secure top notches that they have in Hood River, Wenatchie, North Yakima and Rogue Pliese. When they do other apple and Rogue aame down from Lebanon. valley can raise apples with any place River. When they do other apple vallevs w'll need to take notice.

These apple fairs are going to be great boosters.

### A Private Citizen Now.

Mr. Bryan is now a private citizen, and will prabably remain such. There is none greater, clean, pure minded, a prince among men, an orator with hardly an equal in this country; but he is not and probably never will be president. Had he filled the office of Gov ernor of Nebraska for two or three times in a fearless and competent manner, making a reputation aslan executive he would have stood a much better chance. But it is as a private citizen a clean Christian man, people will know him now. He could do effective work as an evangelist or minister of the gospel, and as such might possibly do more for his tellow man than as president. Whatever he does, he will have a warm place in the hearts of many people, and will never have to take a back seat.

### It Makes One Weary.

For yellow there has never been anything to compare with the foolish dec laration of partizan papers that there is universal returning prosperity on account of the election of Mr. Taft, who is to be successor to another republican president, the idol of the people-Mr. Roosevelt, in whose administration there was a panic, and who then named his own successor.
