## Bean Magic Spray Pumps

Effective spraying means High Pressure Spraying, and till the advent of the Bean Magic a high pressure could not be maintained with a hand pump for any length of time, on account of the body-racking effort needed to operate it. The Bean Magic patent spring divides the work between the two strokes of the handle and works against only one-half the pressure shown on the gauge and saves exactly one-third the labor.

We have these pumps in stock and will be pleased to show them. We cannot recommend them too strongly.
