**2 1/2 TIMES AS MUCH LIGHT FOR THE SAME MONEY**

**Tungsten Lamps Make Electric Light Much Cheaper**

They have two and a half times the efficiency of the ordinary carbon lamp hitherto in general use. The filament is made of a rare metal called Tungsten, which glows with an intense brilliancy at low cost. In shape and size the bulb is just like any other electric incandescent lamp. Why not try a Tungsten lamp yourself? Get one of the 40-watts and use it somewhere in your house in place of one of your carbon lamps. Then observe the great difference. Note the clear white light, exactly twice as brilliant and costing you one-fourth less for electricity. Tungsten lamps are destined to displace all others, for both store and house lighting.

If your plumbing should be out of order these winter days, suppose you have to look over it now. There may be some little thing wrong that would break out on the great frost that will come with your pleasure. An ounce of prevention is better than a pound of cure. Have us do a little preventive plumbing.
