2 1/2 TIMES AS MUCH LIGHT FOR THE SAME MONEY

Tungsten Lamps Make Electric Light Much Cheaper

They have two and a half times the efficiency of the ordinary carbon lamp hitherto in general use. The filament is made of a rare metal called Tungsten, which yields an intense brilliancy at low cost. In shape and size the bulb is just like any other electric incandescent lamp. Why not try a Tungsten lamp yourself? Get one of the 40-watts and use it somewhere in your house in place of one of your carbon lamps. Then observe the great difference. Note the clear white light, exactly twice as brilliant and costing you one-fifth less for electricity. Tungsten lamps are destined to displace all others, for both store and house lighting.

It is now King Albert of Belgium. That word king doesn't amount to very much these modern days.

The neighbors of Dr. Cook, who know him, declare that he did reach the north pole, and say he is a martyr.

Albert says he will treat the natives of the Congo white. If he doesn't we will go over and lick him ourselves.

At least Wright's addition and the section right south of the railroad should be taken into the city, also a little more at the east end of town.
