### Twice as Much Light for the Same Money

is obtainable by using TUNGSTEN LAMPS for electric light. They are made like any other incandescent lamp, with this difference, that the wire filament inside is composed of a rare metal called Tungsten, which radiates two or three times as much light, with the same amount of current, as the ordinary carbon filament.

Ask us to show you the General Electric Tungsten lamp and prove its economy to you.

## MISFITS.

And congress will do as it pleases.  
More elasticity to our banking system is wanted.  
The domination of Wall street is evidently a menace to our banking system.  
Not a fifth of the high school students themselves attended the high school debate.  
The small audience at the high school debate was a slam on Albany. Such things should come first.

It is a mighty good religion to support debating contests, a fine thing in the education of young people.

Corvallis G. T.—The Salem Capitol Journal argues against prohibition and for the protection of prostitutes. In reply to a criticism for this attitude, Col. Hofer is likened to the meek and lowly Jesus. There is nothing more to be said.

## HARRISBURG.

**Bulletin:**  
A representative of the Townsend Creamery Co., of Portland, is to be here next week to take up the proposition of establishing a creamery here.  
A meeting of a number of farmers was held in town last Saturday to consider the advisability of installing independent telephone lines.  
I. N. Warmouth of Halsey has just closed a deal with Geo. McCulloch for the purchase of the latter's 190 acre farm near this place, at \$40 per acre.  
The Jess Baker place of 250 acres was sold during the past week to R. A. Githens and Mr. Lerwill the former taking 150 acres of the tract. Consideration \$35.30 per acre.  
C. F. White killed an eagle out at the White ranch Monday evening that has been a source of annoyance to the ranchers for some time. He has numerous young lambs to his credit and has been an all around nuisance. He had been shot at dozens of times and probably carried half his weight in lead. He measured 7 feet and 4 inches from tip to tip.
