THURSDAY.

SUICIDE AT SALEM

Of Clyde Ashby, Formerly of Albany.

A telephone message this afternoon from Salem reported the suicide there of Clyde B. Ashby, by taking carbolic acid. Ashby was formerly of this city, a lineman for a good many years, and was about thirty years of age. He was married at this city Dec. 10, 1902 to Miss Elva Hale, who with one child survives him. He was prominent here in base ball, and was well liked. The cause of the act is not known here yet. He was a member of the A. O. U. W. of this city, and also of the 2500.

Linn County's History.

A good deal of interest is being taken in the meeting at the U. P. church tomorrow night to organize the Linn County Historical Society. Geo. H. Himes, secretary and curator of the Oregon State Historical Society will make the address, after which a good many pictures of pioneers and early day scenes will be shown on the screen. The meeting is for the purpose of arousing interest in the history of this county and of organizing a Linn County Historical Society to cultivate thoroughly this local historical field. It is desired that everybody attend the meeting and that as many as possible join in promoting the work of the society. Mr. Himes has for many years given his whole time to the work of the state society. He has collected from every corner of the state the recollections of pioneers, old diaries, and every sort of historical document and relic, and arranged them in the rooms of the society in the city hall in Portland. They form perhaps the most attractive exhibit in the city of Portland. Mr. Himes knows the history of every county in Oregon probably better than any other man knows the history of any county. His address will be of great value to every one, both old and young. Go and help to start a work that is to save and help to glorify Linn County from being forgotten for ever.

A Modern Physician's Office.

The corner rooms over the Cusick bank have just been remodeled and equipped in the most up to date style, for Dr. Shinn, who recently moved into them. A neat reception room is entered from the door. Next it is the consultation room, looking much like a parlor. Another room, finished off in tile and white enamel, resembles a modern hospital operating room. It has the sterilizer, surgical instruments and outfit. A fourth room is where the Dr. does his microscopic and analytical work. The Dr., as well as his friends and patrons, are to be congratulated, not only on the modern office equipment and location, but as well his success and increasing practice and popularity as a physician.
