(MONDAY.) OR. ELECTRIC

Getting Ready to Start from Salem.

Portland Journal.—Salem, March 4.—Attorneys for the Oregon Electric railway company will go before the city council of Salem next Monday with a proposed ordinance for a franchise granting the Oregon Electric the necessary right of way in this city for an extension of its line south to Albany and Eugene. Officials of the Albany and Eugene made the extension this summer, the route out of Salem to the south has been decided upon and the extension will be rushed to completion as soon as present right of way matters can be settled. From the present depot of the Oregon Electric company at High and Trade streets, the ordinance for the franchise will propose to grant the Electric railway company a right of way in a south-westerly direction, along Mill street and along the physical demarcation following South Mill creek toward the Willamette river by trestle crossing the south Commercial street line of the Portland Railway, Light & Power Co., on the south to Commercial street bridge that spans Mill creek, thence southerly following what is known as the slough road up the river. A concrete sea wall will be built by the railway company between its right of way along slough road and the Willamette river in order to protect the grade from likelihood of damage from the flood waters of the Willamette. For the past few days six or eight engineers have been at work on the proposed right of way for the Albany extension.
