The Eugene City council has ordered an automobile fire engine, of the W. S. Nott Fire Engine Co., to cost \$7920. It is a combination affair, having a rotary pump, complete chemical apparatus, arranged to carry hose and ladders. No flies on Eugene.

### An Inch Difference.

It has been supposed that the paving to be done in Portland at \$1.50 by the Warren Co. is the same as that being talked about for Albany; but there is a difference. The Portland pavement, on a private contract, when compressed, will be only four inches, while the Albany pavement proposed is five inches compressed which is as thin as pavement should be allowed.

## WANTS TO BE SHOWN.

Manager Stewart today received a letter from J. M. French of St. Paul, acknowledging receipt of a weather card. He says:

"For several years we heard a great deal about your fruits, grains and grasses and didn't believe the stories, but your display at Omaha and St. Paul settled that question. You certainly have the goods. But when the maps show us that you are located as far north as St. Paul and you tell us that the coldest weather you have had this winter was only 21 degrees above zero, we balk. We will have to be shown. If you should put samples in a glass and send it it wouldn't keep during one of our winters. Possibly God can make such a country as you describe, but has he? Here is one fellow that is going to find out, so look out for me. I am coming."

### Up in Seattle.

A letter from Bert Warford tells of his being situated pleasantly there with his wife, nee Miss Bruckman, to whom he was married on Aug. 24. He is working for the Foster-Kleiser Co., but will return to Albany as soon as through there. E. Gale Sanders, Mrs. Hazel Broders Buckman and other Albany people, are doing well.
