O. E. HURRYING TOWARDS THE HUB.

The track laying machine went to work on the Oregon Electric yesterday morning, with 115 men at work, sixty short of the number necessary. In four hours a mile of rails and ties were laid. The crew then went to work spiking down the rails during the afternoon.
The process is said to be very interesting. A car loaded with ties and rails goes along, with a conveyor on either side, one for the ties, the other for rails. The ties are placed upon carriers and spread along. When a sufficient number are down the rails are placed upon them, riveted, when the train goes ahead on the rails laid. The train consists of eight cars.
In a week when the full force of one hundred seventy-five men are secured two miles of ties and rails will be put down daily, which means that it will not take long for Albany to be reached along the practically straight line between the two cities. But the road will then, have to be ballasted and the trolley set before trains can run.

Mosier Fruit Land

F. G. Powers, a former Albany man, writing from Mosier, says the statement of Mr. Castin, recently there, that fruit land cannot be bought at Mosier for less than \$500 is not correct. While there is some land that high most of the orchards are young and prices are lower. But he declares that Wash can and does ride just as good fruit as Hood River, and it doesn't have to irrigate. Unimproved land is as low as \$25, and improved land from \$75 up, some with 3 year old trees at \$100.
