READY-TO-WEAR

WE LEAD THE CITY. While in the store take a walk through this large department and you will wonder where so many fine wares come from. Our ten-to-one showing means that we can show you ten suits where other stores show you one. But still the ratio is about the same, we get ten customers to other stores' one every day. Why?—Ask any Hamilton customer, she knows better than any one else. To get right down to the bottom of the facts, investigate our ready-to-wear lines and be pleased. Thank you for your attention.

POCATELLO SELECTS BITULITHIC.

Twenty-Five Blocks in the Business Heart of the City to Be Paved.

Twenty-five streets in the business heart of the city are to be paved with the popular bitulithic paving, the city council having recently awarded the contract after a thorough investigation of the merits of the different kinds of paving. During this investigation, the reports of various committees sent out by other cities to inspect pavings, were taken into consideration, the report of J. Duder, assistant engineer of Salt Lake City having especial weight.

As the result of a three weeks trip through the east by Mr. Duder recommendations will be made to the city commission of the Utah capital that bitulithic paving be used in all medium traffic and residence streets, says the Pocatello Tribune.

Mr. Duder was sent by the city commission for the special purpose of investigating paving matters, as he is to have charge of the paving and general public improvement work of the engineering office. D. H. Blossom, city engineer, will have charge of the water works, engineering and general supervision.

The engineer visited Pueblo, St. Louis, Kansas City, Omaha and Chicago. In these cities bitulithic pavement has been used to considerable extent. Mr. Duder reports that his investigations demonstrated that the bitulithic material is very efficient. He says he finds it especially adapted to streets with steep grades where a rough surface is employed, and he thinks it will be found satisfactory in Salt Lake.

He found cheaper paving, but in the matter of wearing qualities, he declares, they were not satisfactory and he does not believe it would pay to adopt them.
