THE COLLEGE PRESIDENT.

President Nicholas Murray Butler, of Columbia University, has an article on "The University President" in the American Educational Review. Much of it applies as well to the work of the college president, and is of general interest. He says in part: "It is sometimes supposed that the university president unlocks the doors in the morning, opens the mail, typewrites the letters, appoints, pays, and dismisses the professors, licks the postage stamps, sweeps out the rooms, and closes the buildings for the week. Let me tell you something about the presidency. . . . The president is a prime minister, holding the portfolios of foreign affairs and of chancellor of the exchequer. . . . It is his function to look personally after the external relations of the university. . . . If more expenditure is demanded than the state income will provide, he has to find the income. And up to date he has not been constitutionally empowered to levy a tax collectible by ordinary legal methods!

Furthermore, the president lives almost exclusively in the future. With the work of the current year the president has no contact and but little concern, save as specific problems are brought to him for consultation or advice. He hears nothing of the current work until he reads the records or the newspapers. His concern is almost exclusively with next year and the year after; what are going to be the new activities in 1912-13, 1913-14. . . . So that you may be very sure that if there is going to be any trouble in 1912-13, the president knows about it now. If there is any trouble in 1911-12, he knew about it a long time ago, and it has been pushed out of his consciousness by the trouble of tomorrow.

"Through having an officer whose concern is for the whole university. . . . And who can give his time looking ahead, the university grows consciously, systematically, and it moves forward steadily from year to year. Any university will grow and advance that has the sense to appoint an officer for such purposes and to set him free to do those things. A university that prefers to have the mail opened, and the stamps licked, and the rooms swept. . . . by a president can do that if he chooses. That is not our kind of university." F.

WORLD NOT A DEMOCRATIC PAPER.

Editor Democrat:—In your issue of May 6th you say that the New York World is the leading Democratic paper of the country. This statement is made by the Democrat in referring to an attack made by the World upon Champ Clark, whose nomination by the Democrats, the World says, would be suicide. In calling the World a democratic paper you are, unconsciously, misleading your readers. I say "unconsciously," for I know the Democrat does not intend to do that. But the truth is the World is not a democratic paper. It does not claim to be. It is true, that, occasionally, it calls itself an independent democratic paper. How "independent" it may be inferred from the fact that during the last 20 years it has supported but one democratic candidate for president. Mark this prediction: If Taft is nominated by the republicans and either Clark or Wilson by the democrats the World will support Taft. The attack upon Clark was unjust and uncalled for and was made mainly because he is from the west.

Clark and Wilson are both meritorious candidates and all attempts to belittle or besmirch the reputation of either should be frowned down by all democrats.
