A dispatch from Indianapolis says : "The federal building was crowded to-day with witnesses summoned to appear before the federal grand jury, now in session. All interest centers upon the prosecution of what is known as the "Dudley case." Opinion is openly expressed about the court house that an indictment will certainly be returned in the case. The positive instructions of the court, (District Judge Woods,) relating to violation, or ad-vice to others to violate the election laws is what convinces many that the jury will find a bill against Col. Dudley. A United States marshal's warrant for his arrestwas" issued two days after the publication of the "Blocks of five letters," said to have been written by Dudley. This warrant is still out, and will be held ready for instant ser vice until an indictment is returned against him. The letters, of course, will be the basis of the indictment, in case there is one," The letter referred to is one in which Dudley openly advised chairmen of republican county committees to purchase all the votes they could get.

The lady teachers of Ilitnois outnumber the gentlemen many times over, They are equally good workers, but in the State Teachers' Association have received very little recognition. Last spring they decid ed to organize an Association of their own, which they did, electing as their President, Miss Sarah E. Raymond, who has been for Miss Saran E. Raymond, who has been for many years the city superintendent of the schools in Bloomington. Last week they held their first convention in that city. It was a very successful and interesting one ; attendance large, the papers and discus-sions of an unusally high order. Miss Ray-mond was re-elected president.

Our round the world missionary, Mrs. Leavitt, has just reached, after a quarantine of twenty one days-the city of Mauritins, She describes the Island as being volcanic, the mountain peaks rough, jagged and bare. She states that all cuitivation on the Island is done with a hor, on account of the great number of stones covering the ground. The greatest length of the Island is thirty-five miles, the greatest width twenty-eight. Her letter is full of interest. She pauses in her recital, of the work, and
