

Daily Democrat.

Mr. Halford whom Mr. Harrison has selected as his private secretary, is an Englishman. Can any now doubt that the next administration will be run in the interest of the British?

A Cincinnati firm compelled its employees to parade for Harrison, and to vote as they paraded, and now it reduces their wages from 15 to 30 per cent. These things teach and exhort!

L. T. Barin, chairman of the republican state central committee, and F. N. Shurtleff, ex-collector of customs, both have an eye on the office of collector of customs now filled by H. Abrahams.

Representative Stone of Kentucky has introduced a resolution in Congress proposing an amendment to the constitution of the United States providing for electing the president by the popular vote of the people.

The taxable property of Marion county for the year 1888 is \$1,980,521, less than it was in 1887. No sane man would, for a moment, think that there has been any shrinkage in the values of taxable property in Marion county. This growing evil of unequal taxation demands the most serious attention of the coming legislature.

The Oregonian now opposes the removal of taxes from whisky and tobacco. It has not dared to say this since a few days after the adoption of the republican platform at Chicago. That document declared that the party would repeal all internal taxes before it would surrender any part of the protective system and this accounts for the enforced silence of that paper.

Speaking of the color line in politics, Texas, with its democratic majority of 163,400, has elected five colored men to the Legislature. What Northern republican state has elected even one? It looks as though the Northern republicans were more than willing that the Southern democrats should furnish all the recognition the colored brother is to get.

If the buttermaker would thoroughly please his patrons and secure from them the highest prices going, his butter must not only be of good quality, but uniformly good. It will not do to furnish a poor article one month out of the twelve, or even one week out of the fifty-two. When butter is so evenly superior that customers are able to detect no appreciable variation in it the maker should be getting a fine price.

The New York Tribune states that in Mississippi eight years ago there were 238,532 males 21 years of age and over, yet at the last election the total vote was only 116,000. It then asks if any one believes that there was a free vote and an honest count. In this connection it may possibly be germane to state that the male population of Rhode Island 21 years of age and over in 1885 was 85,717, and yet the vote at the last election was only 40,783. From these figures the unprejudiced observer would be apt to declare that the pathway to the polls was no more thorny in faraway Mississippi than it is in near by Rhode Island.

The taxable property in Linn county as returned by the assessor is one million dollars more than the taxable property of Marion county as returned by the assessor in that county. Every one conversant with the two counties knows that the taxable property of Marion county at par value exceeds that of Linn at par value by at least one million dollars. Here is a greivous wrong and the coming legislature would do well to expend all their aggregated wisdom in fighting this wrong. If no relief is given, the people of Linn will feel it their duty to insist on their assessor making his assessment low enough to correspond with other counties. This is self-defence.

TAKE YOUR MEDICINE.

Harrison was elected President on the 6th of November; on the 13th Caruth's cotton mills, in Philadelphia, reduced the wages of employes 10 per cent. Kerr's cotton mills in the same city on the same day started up with a reduction of 10 per cent on the wage scale. Leak's Star mills manufacturing Terry towels and cloth, on the same day cut wages 20 per cent. But the unkindest cut of all was Hall's Safe and Lock Co. of Cincinnati. This company, gave their men to understand that it would be unhealthy for them if they didn't vote for Harrison. A large majority of them obediently did so. On the Saturday following the election the fillers were cut down 30 per cent, and the wood workmen 15 per cent. November 17, the Atlantic cotton mills cut their weavers 20 per cent, and two of the largest currier firms in the United States made a cut of \$2 per week. We can congratulate the workmen who voted for Harrison and high taxes that they or their brothers and sisters are reaping the legitimate crop from the seed sown on Nov 6th.

To keep onions cool is to prevent them from sprouting. It is better for them to freeze than to keep them too warm. Freezing does not injure them if they are not disturbed and are allowed to thaw gradually. The object should be to keep them as near the freezing point as possible. If they receive warmth enough to sprout they will be injured.

Parsnips, salsify and horseradish can remain the rows where grown, as freezing does not injure them. If they are covered with litter, however, it will prevent sudden thawing around them in the spring. It is too much warmth that does injury in winter to such crops rather than cold. A few warm days in winter may be more detrimental than beneficial.
