The will of an eccentric Frenchman has just been sustained by the Paris courts, in which he leaves his entire fortune to the poor of London, because they are "the born enemies of silly France."

An offer has been made to the British government of £20,000 per annum for the privilege of advertising on the backs of postal cards and postage stamps.

Alexander Graham Bell, in Science, calculates that a mother, in talking to her infant, speaks 36,000 words a day—equal to about four hours' continuous talking.

A fellow that has actually tried says that, although there are three scruples in a dram, the more drams you take the fewer scruples you will have.

President Harrison has discharged nearly all the colored servants of the White House. Hawkins, the colored driver of the Presidential carriage during the last two administrations, is the last to go.

Europe uses about four bushels of wheat per capita each year, of which only half a bushel is imported, or only as much as is needed for seeding the domestic area.

The grandmother of the emperor of China is 89 years old, blind, deaf and a cripple, and the other day her loving grandson presented her with 500 singing birds, 200 silk dresses and 100 musical instruments.

The earliest coinage that can be called American was ordered by the Virginia company, and was minted in the Bermudas in 1612. But then, and for a long time afterwards, the standard currency of Virginia was tobacco.

Statistician Dodge recently stated that the production of wheat in Europe during the last ten years shows no material decline. The average, he says, represents a wheat supply almost sufficient for the wants of Europe, about twice as much as is grown in North and South America, and more than half of all that is grown in the world.

Oil collects on the outside of lamps, because of the capillary attraction of the wick, which draws it up from the inside, and allows it to run over the top of the tube in which the wick is placed. To prevent this, turn the wick down below the top of the wick tube when the lamp is not in use.

Dry wood gives a better fire, and is more economical to burn than green wood, because the latter contains more water, and a large part of the heat of the fire is wasted in converting it into steam, which passes off up the chimney, thus carrying the heat into the outer air, where it is wasted.

A New York physician has enumerated the evils to be guarded against at summer resorts: Over fatigue and undue exposure to the sun, irregular eating, overfeeding on food to which one is unaccustomed, sitting or lying on the ground and unnecessary exposure to the dew and dampness after nightfall are all to be avoided by people who value health.

Charles G Root, who is at San Quentin, Cal., completing a twenty-four year sentence for safe breaking, has fallen heir to a fortune in Germany. He is also the inventor of a shuttle point, which the state uses in all its jute looms. He intends to claim a royalty, but the authorities contend that all a convict's labor belongs to the state.

IN MEMORY OF ANDREW JACKSON.

There is no danger that Andrew Jackson will be forgotten. There will always be more than one page of American history that will be devoted to him, and the impress of his strong individuality will be felt by the people of this country for many generations to come. He is one of the few men America has produced who do not need a monument. Nevertheless, as the present is pre-eminently a monument-building period in American history, it is gratifying to know that a movement has been set on foot to beautify and permanently care for the grounds about his grave within the shadows of his old home. The women of Tennessee have started this creditable work, and propose to make of the Hermitage grounds a beautiful, quiet park, a place for the pilgrimage and rest of patriots, to restore the old home as far as possible to the condition in which it was when the tread of the old soldier's feet was heard in its halls, and to make of his tomb a proper mausoleum to hold his honored dust. The work is being taken up in every part of the country, and it is confidently expected that the money required for the purpose—about \$150,000—will be readily forthcoming. It is stated that in New York Mrs Cleveland is acting as the agent of the Ladies' Hermitage association. Other prominent women have already identified themselves with the movement, and its success seems to be already assured.

It is reported of the celebrated English physician, Dr Field, that at a time when diphtheria was raging, a few years ago, he used nothing but common flour of sulphur, a teaspoonful mixed with the finger in a wine glassful of water and given as a gargle, and in ten minutes the patient was out of danger. He never lost a case of this disease. Sulphur destroys the fungus in man and beast. In extreme cases, where a gargle could not be used, dry sulphur was blown down the throat through a quill, and sulphur burned in a shovel so that the patient could inhale it.

An effort is to be made in Iowa to strip the law of its nonsense. Lawyers declare that deeds, warrants, and all other legal papers can be cut down one-half in the amount of whereases and wherefores.
