THE TEACHERS' INSTITUTE.

THURSDAY AFTERNOON SESSION.

Mr Egan, of Marion county, spoke as follows: I believe the school aids can be made practicable.

Supt McElroy thinks one cheap school aid is a good teacher. School organization, by Mr Roberts, of Silverton. He thinks the teacher in opening the school in a neighborhood should visit the patrons prior to opening; should find out what his predecessor has done; should have his work outlined. It is hard to find a school perfectly organized.

Song—The Old Mountain Tree. Reces. General discussion—What are proper incentives to study?

Prof Campbell, of Monmouth, said: No one method can possibly answer. We need the broad, general methods.

Prof Gilbert, of Philomath, said a pupil should be complimented on his good work.

Mr Longacre, of Buena Vista, thinks we don't need very many incentives.

Mr Hunsaker, of Marion county, said: Let the teacher study the mind of those about him. He don't think a child needs any incentive.

Mr Hickman said: Induce the pupil to see the beauty of knowledge.

Mrs Williams, of Polk county, gave some excellent ideas.

Mrs C C Lewis, of Marion county, spoke at some length.

Mr Bell, of Roseburg, said that scolding is barbarous. Supt McElroy and others spoke on the same subject.

THE TEACHERS' INSTITUTE. EVENING SESSION. The teachers were greeted by the largest audience that ever congregated at the Opera House, fully one thousand being present.

An instrumental solo by Miss Etta Stratton, of Salem, was well received by the audience.

Recitation, "Tact and Talent," by Melvin Williams, was very heartily received by the audience. The young gentleman displayed much of both branches of his subject in his manner of delivery.

Then came a touching song sweetly sung by the young Misses Gihler, of Brownsville, which aroused the enthusiasm of the audience to a high pitch.

A "Wand Exercise" by pupils of the Albany public schools, conducted by Miss Lillie Robertson, one of the teachers, called forth unstinted applause and a hearty encore.

A recitation by Miss Mamie Hyde and one by Miss Edith Ashby were duly appreciated and applauded.

Prof Campbell, of Monmouth, lectured on the subject of "The Teacher's Profession," comparing it in its many aspects with the profession of law, medicine and theology. His discourse was replete with sound, practical suggestions and thoughts and was much appreciated.

suggests that the teacher should help contribute. Mr McDonald has succeeded in getting a good library at Brownsville. Supt Curl called for the expression of the institute whether each district should have a library. Said that he had corresponded with parties who will furnish books at 20 per cent discount. Profs Wright and Baker insisted that teachers should use good English in presence of pupils in connection with their reading.

Language—J B Leatherman, of Woodburn schools, read a paper of marked ability. Commencing with early childhood he traced a gradual development to perfection. Technical grammar should be laid aside until a considerable development of the pupil's mind is made. Children should be taught to write letters to intimate friends, rather than to write on obtrusive subjects. Miss Godley thought teachers should commence teaching language when children are very young. Mrs Thrall said every lesson should be a language lesson and thought it a waste of time to have pupils print their lessons.

The ladies were applauded by Mr Bell of the Compendium and Mr Baker, Supt of Yamhill Co., for the active part taken in the discussion. Teachers preparation, by Prof Walker, principal of public schools. Deficiency of organization and methods were pointed out by Prof Walker, and he showed clearly that a daily, dry routine in teaching is detrimental to the best interests of the pupil.

Music, by Miss Robinson's class, comprised a part of her pupils. Reading, by Miss Fry, of Dist. No. 11. Crawford & Paxton, the photographers, appeared upon the ground, north of school building, and took a picture of all present.

A paper on technical grammar, by A J Garland, of North Brownsville school. A plea for skilled work, by Prof R N Wright, of the Santiam academy. His paper, like that of Prof Garland's, was excellent.

Comparative merit of mixed and graded schools, by Prof W T Van Scoy, of Jefferson institute.

SEE THEM.—A good way to learn the merits of a thing is to test it. If you would know something of the quality of a fabric examine it by a good light. In the tailoring department of L E Blain, under the supervision of Mr E A Schiffer, whose skill as a cutter and fitter is well known, is a new stock of suitings, just received, of a large dimension for the market. In order to appreciate the variety and quality of the goods the people of Albany and vicinity should call and examine them, and then decide whether it is the largest stock and best lot of fabrics in the valley. This department is gaining in popularity, and it is the aim of the management to keep a stock of suitings on hand unsurpassed in this part of Oregon, and make them up in a way that will give general satisfaction.
