

Of the Oregon State Weather Bureau, co-operating with U. S. Signal Service, Central Office, Portland, Oregon, for the week ending Saturday, May 10th, 1890:

WEATHER.

The temperature rose again in forepart of week and fell in latter part. Temperatures of from 80 to 88 degrees, occurred in all parts of the state. For the week it has been above the normal. Frosts occurred in sections of Wasco, Sherman, Gilliam, Morrow, Crook, Grant, Harney, Gilliam, Lake and Klamath counties on the 8th, 9th and 10th, doing damage to vegetation and tender plants. Rain fell in the western districts of Eastern Oregon, in Southern Oregon and along coast on the 7th and 10th, doing great good to all vegetation, except in sections of Wasco, Sherman and Western Klamath counties, where, as in the Willamette valley, the rain was very light. In these latter sections rain is badly needed. The mornings have been more cool and cloudy, and these features have helped crops along.

GROWING VEGETATION.

Fall and early spring sown wheat are growing finely. Late spring wheat will not germinate properly without more rain. Oats, barley, rye and corn are doing very well. Vegetables are becoming very plentiful, but for all rain is needed, especially in the Willamette valley fruit prospects continue good. Grass is growing nicely, the peach crop is the only one that is now sure to be short. If the codlin moth is controlled, the apple and pear crop will be good. From most every correspondent comes the desire for rain. In Washington county, everything is growing rapidly. Cut worms are injuring the onion crop. In Clackamas county cherries and peaches promise large yields. In Yamhill, the wheat crop will be good, without more rain, and fruit will be abundant. In Marion, the dry weather is injuring the crops. Fruit will be plentiful in Polk, wheat is an average fairly well. Hop crop will be an average one. In Linn, fall wheat looks fine. Spring wheat is uncertain. Fruit plentiful except peaches. Gardens doing well. In Benton, wheat on loose, moderately well. In Clatsop, wheat is well. On low undrained soil, growing has made. But little growth and needs rain. In Lane some rain fell on the 10th, which was very beneficial, grass growing rapidly and crops fine. In Douglas, rain of past days has been very beneficial. Crops very promising. In Jackson, farmers are preparing to mow alfalfa, fruit has escaped frosts and danger from them is now past. All crops promising. In Wasco, more rain badly needed, but crops promising. Grass good. Rain on 10th, moistened soil 2 inches deep. In Sherman and Gilliam crops doing well, stock fattening up. In Morrow prospects were never better for crops. Thunder on 7th. Rain was very beneficial. In Umatilla and Union the rain was very beneficial. Crops growing finely, excellent prospects. Fruit plentiful. In Crook, Grant and interior counties rain fell last week, frosts did some damage. Hay and grain crops flustering and fruit will be very plentiful.

B. S. PAGE, Assistant Director Oregon Weather Bureau.
