LOCAL RECORD

CETHER THREE SISTERS,-G. W. Slav a, who returned on Monday from a trip the Cascade mountains, reports having gended the middle one of the Three Sitagended the middle one of the Three Siz-ters on the 21st with a party from Eugene. Their party consisted of thirteen persons, and they left their camp, eight miles from the mountain, at sunrise and arrived at the glacier about 11 o'clock, where they hanched, and then began the ascent. The glacier, Mr Slayton says, is grand, though difficult to travel over. It is several miles in length, and consists of snow from 100 10 150 feet in depth, and eften there are deep crevices which amount to each to the deep crevices which appear to reach to the lotton and are several teet in width. These have to be jumped, and unless is sure-footed occasion considerable danis sure-fosted occasion considerable danger. Only three of his companions succeded in reaching the summit of the
mountain, the rest having given out
farther down the mountain. The summit,
he says, is composed of tones shell rack
and large howlders and is not at present
covered with snow. The view from the
summit of this mountain, which is estimated to be between rooms and races feel
above the sea level. Mr Siaston says is
ndeed grand, and well repays one making
he ascent.—Ochoco Iteylaw.

A PUNE VALLEY .- As Albany people are interested in the Tillamook country, are interested in the Tillamook country, on account of the prospect of an early railroad connection with h, we give the following good description of the country from a Salem paper: State Superintendent McElroy and party, have returned from Tillamook county. Supt McElroy went over for the purpose of attending the annual teachers' institute and to look after the county educational interests in general. While there he wilded the netwerks the county educational interests in general. While there he wisited the principal points of interest, including the Tiliamook valley, the Nestucca county, Bay City, and other points. He was greatly pleased with the fine timber, the rich soil, and the limmense production of grass, vegetables, oats, fruits, honey, etc. The Tiliamook valley, proper, is a large country and contains from one hundred to one hundred and fifty square nites of splendid country, and is very fertile. The future of Tiliamook country is height and encouraging, and within a very few years her valleys will be peopled with a large and industrious population.

CLEARLY EXPLAINED. - In the east wheat is selling for 20 cents per bashul more than it did last year at this time, while here it is only one or two cens ligher than it was a year ago. A great many wonder why there is such a relative difference and think there will surely be a rise in the price of wheat here. There may be, but the chances are there will not, The reason for the difference is that ship-ping rates are higher here than they are most years. With a large fleet of vessels most years. With a large fleet of vessels at the Pacific coast ports the rate of ton-nage is much less than it is now, and yes sels are often ghad to get wheat for bal-last at almost any price. This year yes sels are not looking for wheat but shippers is belief to the party of the party o are looking for vessels and are obliged to pay high rates, which of course, lowers the price of wheat.—Eugene Register.

FELL OUT,-Yesterday Mrs Dr Woodle was assisting in stratching the barbed wire for a fence on her farm, a few miles from this city, when her dress caught in the wire and she was thrown out of the wagon, in which she was riding to the ground, striking on her face, nearly causing a fracture of the jaw-bone.

EGTAL TO THE OCCASION, -We have heard of one man in this county who has contracted his hops to three parties; to one at 13 cents, to another at 18 cents and another at 25 cents. As they are now worth 30 cents he will probably contact them to some one else—Eugene Register. As the contractors half the time back out in case of a drop, the Lane coun-evidently understands his business
