OH, MY BACK!

BOON IT WILL BE TOO LATE.

I have been troubled many years with disease of the kidneys and have tried wany different remedies and have tried wany different remedies and have sought sid from different physicians without relief. About the 15th of April I was suffering from a very violent attack that almost prostrated me in such a manner that I was bent over. When I sit down it was almost impossible for me to get up alone, or to put on my clottee, where kind Providence sent Dr. Henley, with the OREGON KIDNKY TRA, to my hotel. I immediately commenced using the tes. It had an almost miraculous effect, and to the astonishment of all the guests at the hotel, in a few days! am happy to state, that I was a new man. I will recommend the tex to all afflicted as I have been.

irozziete. CALIFORNIA FIO SYRUP CO. HOW THEY DRIVE IN LONDON,

E. gland is the only place I know of siere they drive to the left. English birers say that by sitting on the right and driving to the left they can better watch the hubs of approaching vehtcles, and thus prevent collisions. I don't exactly understand this, but it is the explanation they

give for driving to the left. Quick-going vehicles will turn a corner harply, but the driver raises his whip to sotify the vehicle in his immediate rear that he is about to turn. "Cabbles" are nore considerate concerning fellow-drivers than they are thoughtful about the lives and limbs of pedstrians. All their atten-tion is given to the roadway. Pedestrians must took out for themselves or be run ver. That is why so many of the London police are engaged solely in attending to street traffic. Yet with all their vigilance, more accidents occur in London proportionately, than elsewhere. London drivers are polite and very civil to each other. If an obstruction appears in front of a horse, or if for any reason he is obby holding out horizontally his left arm; and this sign is passed down from one driver to another until the very end of the line of blocked vehicles is reached.-N. Complete statistics are given of Alarka, Arizona, California, Idaho, Nevada, Oregon and Washington. The exports from Alaska during 1889 amounted to \$0.840, 730, representing an investment of \$4.-110,000. Of the total gold and silver product in the United States 62.1 per cent of the gold, as per cent of the silver and \$1.5 per cent of the total of both was the product of the Pacific coast. The total for the Pacific coast from 1851 to 1889 inclusive, was \$30,088,000.

A Fine State of Alarka.

WASHINGTON, July 15-Secretary Foster a few days ago conceived that it would be a good idea to "round up" the clerks in the treasury department who are away on sick leave, and in doing so be uncovered an interesting state of affairs. Under the law at present, a clerk absent on sick leave draws about two thirds of the salary of the position, while the duties are performed by a substitute selected from the civil service has of eligibles, who draws the remainder of the salary. In making his "mund up" the secretary finds that a number of clerks have been absent for months, the only evidence of their existence being the occasional appearance of a physician's certificate and the regular issue of a monthly check. One clerk, a woman, has not been on duty for two years, and a chief of division, who was appointed early in the administration, reports that he has never seen a certain clerk whose name is on the roll. All delinquents of this kind will be notified that if they are not on duty at a fixed date their places will be filled.

They are the best to be obtained, as an inspection will show, and Mr Graham is prepared to make them up in the latest style with a skill his long experience has enabled him to be master of.
