

WEATHER REPORT.

OREGON WEATHER BUREAU. CENTRAL OFFICE, PORTLAND, OREGON. CROP-WEATHER BULLETIN No. 23, FOR THE WEEK ENDING SATURDAY, AUG. 15, 1891.

In Western Oregon a few showers occurred along the coast; in the interior valleys, the mornings were cloudy, cool and damp from dew, the afternoons were warm; the maximum temperature ranging from 78 to 90 degrees.

Threshing of fall wheat has been in full operation. The berry is, as a rule, large and plump and it is considered to be extra good milling wheat. Portland price this morning is 87 cents per bushel, which is about 10 cents per bushel more than was paid this time last year. Yields of from 25 to 43 bushels per acre are generally reported. In Curry county a crop of alfalfa, blades about 22 inches long, have been cut this year up to July 25th, without irrigation. Oats are heavy and a good crop. Serious damage is feared from the hop louse. Peaches, corn and melons are fully an average crop. Watermelons are now ripe in Josephine county.

In Eastern Oregon no rain is reported to have fallen. The temperature has been about the average; the maximum temperature ranged from 85 to 92 degrees.

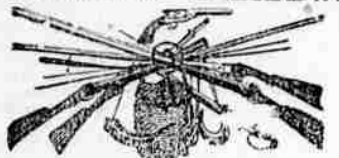

There is a serious lack of harvest hands in most sections. Heading and threshing are in full progress. The wheat is turning out about even the expectations of most farmers. The quality is generally above the average. Prices today in Pendleton for wheat are 65 cents for blue stem and 64 cents for club.
