"August Flower"

I had been troubled five months with Dyspepsia. The doctors told me it was chronic. I had a fullness after eating and a heavy load in the pit of my stomach. I suffered frequently from a Water Brash of clear matter. Sometimes a deathly Sickness at the Stomach would overtake me. Then again I would have the terrible pains of Wind Colic. At such times I would try to belch and could not. I was working then for Thomas McHenry, Druggist, Cor. Irwin and Western Ave., Allegheny City, Pa., in whose employ I had been for seven years.

FACTS ABOUT THE TEA WE DRINK.

But few people know that there is such a thing as sun-dried tea in existence, and fewer have seen it. But there is, and it is of all teas the sweetest, purest, and most fragrant.

Green Teas. Few people know that the bright bluish-green color of the ordinary teas exposed in the windows is not the natural color. Unpleasant as the fact may be, it is nevertheless artificial: Prussian blue, silica, gypsum, plumbago, and other unwholesome mineral colors being used for this purpose.

Black Teas. The basket and pan-fired Japan teas, as well as the China teas that may be included under the general heading of "black tea," get their color from the firing or roasting process, but mineral coloring matter is also frequently used to give a certain desired commercial appearance.

Beech's Tea (Sun-dried). Concerning sun-dried teas the people of the Pacific Coast have heard but little and know less, although it is extensively used where it is known and understood.

About the Cost of Teas. According to the custom-house reports, the amount of tea received at San Francisco last year (1890) was 8,840,137 pounds, and the value \$26,250, or a fraction over 30c per pound.
