

SOMETHING QUERRE IN THE NUMBERS 3 AND 7.

Mr John W Kirk, the white-haired veteran who was with Morse when the first working telegraph line was stretched, and who stood beside the great inventor when the first message was transmitted from Annapolis Junction to Washington, has made during his life a great many interesting calculations in numbers. The two most remarkable numbers in the world are three and seven.

"The numeral seven," says Mr Kirk, "the Arabians got from India, and all following have taken it from the Arabians. It is conspicuous in biblical lore, being mentioned over 300 times in the scriptures, either alone or compounded with other words. It seems a favorite numeral with the Divine mind, outside as well as inside the Bible, as nature demonstrates in many ways, and all the other numerals bow to it. There is also another divine favorite, the number three, the Trinity. This is brought out by a combination of figures that is somewhat remarkable. It is the six figures 142,857.

"Multiply this by 2, the answer is 285,714. "Multiply this by 3, the answer is 428,571. "Multiply this by 4, the answer is 571,428. "Multiply this by 5, the answer is 714,285. "Multiply this by 6, the answer is 857,142. "Each answer contains the same figures as the original sum, and no others, and three figures of the sum remain together in each answer, thus showing that figures preserve the Trinity.

"Thus 285 appears in the first and second numbers, 571 in the second and third, 428 in the third and fourth, and 142 in the fourth and fifth.

"It is also interesting to note that taking out of any two of these sums the group of three common to both, the other three, read in the usual order, from left to right, will also be in the same order in both sums.

"Take the first and second sums, for example. The group 285 is common to both. Having read 285 out of the second sum, read right along and bring in the first figure of the thousands last. It will read 714. All the others will read in the same way.

"Again, note that the groups of three in the first sum are the same as the two groups of three in the fourth reversed in order, and that the same thing is true of the second and third. The last multiplication has its groups of threes the same as those of the original number, reversed again.

"Examine these results again, and you will see that in these calculations all the numerals have appeared save the 9. Now multiply the original sum by the mighty 7—the divine favorite of the Bible and of creation—and behold the answer! The last of the numerals, and that one only in groups of three—again the Trinity! 142,857 7 999,999

"No other combination of numbers will produce the same results. Does not this show the Imperial multipotent numeral 7 and its divinity?"

Replying to the query of a young school teacher, we answer that the amount of surplus money in the treasury of the United States at the close of Cleveland's administration was \$136,607,265 11 while the available surplus now is \$1,656,942 51. There is a whole volume in that simple unvarnished statement.

At the joint debate to be had between Gov Campbell and Maj McKinley on the 8th of October at Ada, Ohio, the former will open the debate with a speech of one hour and five minutes long. McKinley will follow with a speech of one hour and a half and Campbell will close in twenty five minutes.

Since the ice age, there is evidence in the fossil remains and floras of marine deposits and peat bogs that northwestern Europe has experienced for some time a climate considerably warmer than that of the present day.

The democrats of Massachusetts have renominated Wm E Russell for governor and adopted a tariff reform and anti-free coinage platform.

The republicans of Colorado and South Dakota have adopted platforms favoring the free and unlimited coinage of silver.
