Daily Democrat.

"PRICES AT HOME AND ABROAD"

The Evening *Telegram* under the above caption, gives the tariff bone a sledge hammer stroke and shatters it to the marrow and says:

An instructive fact in connection with the cost of manufactured articles is that American manufactures of almost every description are sold abroad cheaper than at home. The infamous tariff laws are especially designed to allow manufacturers to plunder the American people, who become so used to paying extortionate prices that they do not realize how they are being robbed. Hundreds of articles of common use are sold in foreign countries for from 20 to 100 per cent less than they are to home consumers. A sewing machine, for example, that sells for $50 in Michigan can be bought across the line in Canada for $30. A hat of New York or New England manufacture that is sold in Canada or other foreign countries for $2 cannot be bought at home, next door to the place where it was made, for less than $3 or $4. So it is with hundreds of articles. Cutlery that is sold in England in competition with its own celebrated wares is sold at home for a far larger price than it is abroad. So with farm implements and machinery, for which the American farmer is charged a large percentage more than is paid by the farmers in any other country. The tariff tax cannot touch with its blighting, thieving hand the foreigner, but it has no mercy on the home consumers. The prices paid for these articles by foreign consumers are what the manufacturers can afford to sell them for, but the American consumers are obliged to pay a large percentage in addition, in order to make the manufacturers "fat," so that they can, in turn, help out the political party that thus plunders the people in their interest.

The fisheries form one of the largest and most important industries of New England. In 1888 they gave employment to 37,261 persons, of whom 15,612 were vessel fishermen, 11,298 shore and boat fishermen and 10,351 shoresmen, preparators and factory hands. The capital invested is estimated at $20,109,220, of which $6,408,038 consisted of vessels and outfits, $683,776 of boats, $1,530,532 of apparatus of capture, and $11,391,764 of shore property and circulating capital. The value of the output for that year is placed at $11,074,501, of which about three-fourths consisted of general food products. The length of the coast line adapted for fishing is 3460 miles, apportionated as follows: Maine, 2140 miles; New Hampshire, 35 miles; Massachusetts, 750 miles; Rhode Island, 245 miles, and Connecticut 200 miles.

The Capital *Journal* speaking of the scheme now on foot to appoint Joe Simon to the U S judgeship lately created, says:

The senators from Oregon, who would allow such an appointment confirmed would dig their political graves so deep as to never be heard of politically again, and Oregon would be safe for 5000 democratic majority in the next presidential election.

Why not appoint him? He is just as fit as Cy-Dolph *or any man whom the corporations will permit to be appointed.*

Vegetation in the Alps recedes downwards from year to year. Formerly Alpine roses grew at an attitude of 7600 feet. Now they are seldom found higher than 6500 feet, and that are at that height stunted. Beeches have gone down to 1200 feet. Various berries, which once flourished 7500 feet above the sea level, do not grow in higher altitudes now than 5800 feet.

A system of photographing in colors, following that of M Lippman, proceeds on the theory that there are four primary colors—green, red, blue and violet. Four pictures are taken simultaneously by means of four lenses, in front of which is a screen of the color originally used. Pictures are produced which include the colors of the original.

It is believed that there are traces in the animal kingdom of a law that fixes the extreme duration of life at five times that of growth. This latter period in man may be said to average 21 years; hence the full span of a perfectly healthy man's life should range from 100 to 105 years.

In a half column of local items printed last week in a North Carolina newspaper in a town of 3000 inhabitants nine colonels were mentioned, all residents of the town.

The rates of postage from the United States to New Zealand and to the British possessions in the South Pacific has been reduced from 12 to five cents. They have joined the universal postal union.

The Death Valley must henceforth be classed among the sentimental shams. The government survey party has found 200 varities of wamals inhabiting the valley.m

Bounties were paid for 61 bears, 30 wolves 49 lynxes, 6016 foxes, 838 eagles and 4539 hawks in Norway last year.

During the past year the water of the great lakes has been lower than at any time in 20 years.

Soundings to the depth of 26,700 feet have been made on the coast of Africa.

Just received now and opened for retail a C E Brownell's the following

Chow Chow,
Cooking Molasses,
Pickles in vinegar,
Salt Herring,
Salt white fish,
Salt salmon.

Decidedly the largest and choicest variety of tea in town is at C E Brownell's. Sun dried, basket fired, green, black, English breakfast, &c.

The *Statesman* speaks of the New York Sun and "democrats who have a leaning towards protection," while in truth and in fact there are no such democrats. The New York *Sun* has not supported a democratic candidate for president since 1876. There are a few men scattered here and there over the country who, before the tariff was made a vital issue, were democrats, but finding themselves out of harmony with their party, no longer vote their party ticket. There is no law that would prevent a man making a fool of himself, and that is the reason why now and then a newspaper can be found that talks about the existence of a class of beings known as "protection democrats." The *Statesman* ought to know (though it appears that it does not) that on a score of occasions Gov Hill in public speeches has avowed his adhesion to the policy of tariff reduction and reform, thus showing that he is fully in line with his party on that subject.

And, now, it is whispered that the New York delegation in the national democratic convention will be absolutely under the control of Gov Hill and that under no circumstances would he permit it to support Cleveland for the presidency. That the convention outside of New York will not consent to the nomination of Hill. That this dead lock will lead to a compromise on Governor-elect Flower. Flower would make a very good candidate indeed. He would make a good president. No democrat could complain at the selection of Flower.

A pin manufacturer in Ansonia, Ct, is about to utilize some 20 barrels of imperfect pins in building a sidewalk in front of his residence. There is in that town a small piece of sidewalk built of scraps from the pin factory which by corrosion has become so hard in a few years that it required much hard work in drilling and blasting with dynamite to make a hole large enough to set a telegraph pole, although it was but three or four inches thick. It bids fair to last as long as a sidewalk of solid brass.

PHOTOGRAPHS OF THE WORLD.—A new work by this title is just out. It consists, as its name indicates, of photographs of all widely known objects in the world, such as Blarney Castle, in Ireland, Forth bridge and Balmoral castle, in Scotland, Shakespeare's house, Windsor castle and London bridge in England, City of Moscow, Berlin, birds eye view of Paris Cathedral of Notre Dame, Constantinople, Parthenon in Athens, Venice, Colloseum, St Peters and Vatican, in Rome, etc. All these views are executed in the highest style of the art and mechanically the book consisting of over 500 pages is at once "a thing of beauty, a joy for ever." No more beautiful and tasty ornament could be secured for a library or parlor. Get one.

Last year potatoes were scarce and dear in California. This year, in one California district near Sacramento, 60,000 bushels of potatoes were not dug up because it would not pay to market them.

Bad Blood.

Impure or vitiated blood is nine times out of ten caused by some form of constipation or indigestion that clogs up the system, when the blood naturally becomes impregnated with the effete matter. Thus Sarsaparillas attempt to reach this condition by attacking the blood with the drastic mineral "potash." The potash theory is old and obsolete. Joy's Vegetable Sarsaparilla is modern. It goes to the seat of the trouble. It arouses the liver, kidneys and bowels to healthful action, and invigorates the circulation, and the impurities are quickly carried off through the natural channels.

Try it and note its delightful action. Chas. Ivey, at Bozorth's Third and Market Streets, S. F., writes: "I took it for vitiated blood and while on the first bottle became convinced of its merits, for I could feel it was working a change. It cleansed, purified and braced me up generally, and everything is now working full and regular."
