INDIANA[FOR CLEVELAND,

The Cleveland boom sweeps everything before it. Indiana will not only take the lead in the movement in his behalf, but it holds the position of vantage and from present appearances the influence of this state will be felt as it never has been before in a national convention. The delegates from the state at large will be composed of ardent Cleveland men not now in office. The old practice of sending United States Senators as delagates ought to be and prolably will be abandoned. Such honors as a delegate from the state at large ought not to be added to those who already are honored by the state as its representatives in the senate. There is another reason why neither senators nor members of congress should be placed on Indiana's delegation and it is that the atmosphere of Washington and the associations of official life at the Capital tend to estrange those who live there from the real wishes of their constituencies. It is a matter of common notoriety that Cleveland is not popular in the official circles of Washington, and it is equally notorious that the democratic members of congress and democratic senator, with a few exceptions, have declared themselves for anybody, and especially for Senator Gorman, against Cleveland. The democratic people of Indiana are 'largely in favor of the nomination of the ex-President, and their wishes should be expressed by a delegation in perfect harmony with their views. The several district meetings will take care that Cleveland men sre named as district delegates and will probably instruct for Cleveland. The delegates from the state at large will be chosen by the state convention, and it is of the highest importance that neither "senatorial courtesy" nor any other concession to a misleading sentiment should be permitted to influence their selection.

If the majority of the convention shall be favorable to the nomination of Cleveland, none but out-snoken Cleveland men should be named as delegates. This is so palpably a practical suggestion that it need not be discussed.

Let us have a solid delegation composed o men who are known to be uncompromisingly and enthusiastically for Grover Cleveland .--Evansville (Ind.) Coniver.

TWO ALLEN COUNTY STRAWS .

At the last meeting of the Fourth and Fifth Ward Democratic Club a rising vote was taken for president, and 116 voters - every man in the hall-stood up for Grover Cloveland an chested his name to the echo. This is a straw At a barn raising at the home of George W Treece, in Cedar Creek Township, last week, a vote was taken for president. It resulted: Cleveland, 48; Harrison, 9; Gresham, 3; Palmer, 1; Gray, 1. It was a mixed gathering of democrats and republicans, but M Cleveland only lost two votes out of lifty, This is the ratio everywhere, --Fort Wayne Journal.

It may be interesting to know that seven candidates on the state ticket were appointees of Gov Moody during his incumbency of the of Gov Moody during his incumbency of the executive chair. This is strong commenda-tion of his judgment and evidence that "Moody men" are not so had after all. Hon T A Moore, candidate for saprezes judge, came into prominence from being a "Moody man," and so did Hons L Webster, W R Ellis, Leyal B Stearns, Geo Watkins, T A McBride and others,—*Mountai.eer*.

But when you get a full knowledge of the "record" (Oregonian) of F A Moore, you will devoatly wish that Moorly had never heard of him.

FOR THE BEST AND CHEAPEST CLOTHING.

The following averages of the price of Ohlo wool in comparison with the price of the corresponding foreign grade during a quarter of a century of wool taxes are given in Mr Springer's speeth:

Average annual price of wool for the twenty-five years: Ohlo, 41.48 cents; Port Phillip, 41.64 cents. Difference in favor of Americaan, 44 cents. Average annual price of wool for twenty-three years, builting 1571-72: Ohlo, 40.76 cents; Port Phillip, 40.52 cents. Differ-ence in favor of fareign wools, 26.

The years 1871 and 1872 were years of desperate speculation in wool, and for this reason the comparison is made with both them and sithout them. The figures on which it is based were furnished by the republican Census Bureau through a special agent, who is also the secretary of the Woolen Manufacturers' Association, It is known to all students of the subject that the average price of American wools has not been raised by the tariff against Importations, because this tariff serves to diminish the co.sumption of woolens and to greatly increase the use of cottons, shoddy, jute, waste and hair in so called "American woolens." And it often happeas that the influence of the woolen manufactures is sufficiently great, they being a compact body of corporations, to '-bear' the prices of American wools and so regain from the American producer some. thing of the tax they are compelled to pay

on foreign wools, But the Cheap Clothing bill is drawn in the interest of the people, who have a right to the best and cheapest woolen clothing that can be had for their money. It depends on this principle and not on any array of statistics. It is well enough to demonstrate the fact that it will tend to ncrease the consumption of American wool and not to lesson it,but in six months the average farmer will save more on clothing after the abolition of all prohibitory duties on it than he has ever got for his total wool clip in a year.

The object of the bill is to abolish all prohibitory duties on woolens of all kinds, The abolition of the duty on wool goes with this as a matter of course, but it is only an incident of the main object-the restoration to every man and woman in America of the right to buy the best and cheapest clothing that the world can fornish for the money.
