Qaily Democrat.

THE COMING STATES

It is probable that New Mexico and Arizona wid now be admitted to the union as

It would have been wiser perhaps to make all the sparsely populated territories wait for a time, but that was not done. Montana was admitted with 132 159 inhabitants, Idaho with 84,385 and Wyoming with but 60,705. Simple equity entitled New Mexico and Arizona to admission at the same time. The population of Arizona is almost exactly that of Wyoming, while New Mexico has more people than Wyoming and Idaho combined.

But a republican congress desired to strengthen the republican hold upon the senate and the electoral college by way of preventing the people from turning that party out of power. It therefore admitted those territories which were believed to be securely republican and kept out the democratic territories. It is only fair that the latter should now be admitted.

In point of population Utah has a still better claim, The figures for that territory are 207,905, exceeding those of any of the six states last admitted except South Dakota. Utah is also supposed to be democratic, but there was the additional excuse of polygamous practices on the part of the Mormons. That objection was once sound, but it is less pertinent now. The Mormon church has apparently surrendered to civilization, and Utah will now probably come into the union with a constitution in harmony with the country's institutions.

STEADFAST NEW JERSEY

The official canvass of the vote in New Jarsey shows what little basis there was for the republican attempt to raid that stendfast state.

Mr Cleveland's plurality is 14,885, against 7,149 in 1888-or more than double. The total democratic vote is 170,479, an Fucrease of 19,000 over 1888. The republi-

can vote is 155,594, an increase of 14,000. The democrats elect six of the eight representatives in congress, securing the member gained under the new apportionment.

The compact little commonwealth across the river may be set down as a rock-ribbed democratic state.

THE PERSION DEFICIT

One of the first measures to be considered at the next session of congress is provision for the deficiency which the pension ex-penditures are creating. It appears that these expenditures have increased nearly sixteen millions for the first three months of this year over those for the correspond-ing period in 1891. At this rate of pro gress there will soon be a lamentably large hole to fill up. It looks as if the deficit to be provided for at the winter session would not fall far short of \$36,000,000.

How long must this odious system of bledding the nation be kept up? Why does no some one arise with measures which shall put a stop to wholesale pillage that benefits no veterans, but is absorbed by frauds and worthless parasites?

The men most fit to decide us to the details and methods of tariff revision are those leaders of the reform movement who have for years made the matter a subject of careful study and who are in close touch with the people. A committee, formal or informal, composed of such men as Car-lisle, Mills, Crisp, Springer, W C P Breck-incidge and Wilson, of West Virginia, and the other leaders on the democratic side in the house and senale, would do more than any other commission of outsiders could do to prepare a safe program for action.

Ralph Lane and his companions, of Sir Raleigh's Virginia expedition, were the first to carry tobacco into England. They learned from the Indiana to 1t 1n Indian fashion, by drawing the smoke into their months and putting it out through their nostrils. Raleigh adopted the practice, and many distinguished men and women followed his example.

THE PENSION PERIL.

On the 1st of January next there will be on

the pension roll full 1,000,000 names.

The appropriation for the payment of penions which Congress is expected to make at the coming session is \$186,000,000. These figures are startling.

They show that the pensioners are in the proportion of nearly one in tacke to the vo ters of the whole Union. And this for a war that ended more than a quar'er of a century

They show that the cost of the pension list absorbs more than 40 per cent of the nation's revenues.

The pension list costs \$120,000,000 more than the entire expenses of the Covernment in the year before the war. It has increased \$160,000,000 since 1877, when the war had been ended a dezen years.

The number of pensioners on the 1st of January will almost equal the regular standng armles of France and Germany combined, which contain 1,046,000 men.

The cost of the list exceeds by \$73,000,000 the smual cost of the great standing a my of overtaxed Germany. It exceeds by \$56,000, boo the cost of the standing army in France,

Under the reckless Irgenuity of rapacious claim agents and the partisan zeal of a corrupt Pension Commissioner the list is increasing at the rate or \$350,000 a month. If not checked the cost for 1894 will reach the enormous sum of \$200,060,000!

This carnival of wrong and robbery must cease. The pension list must be purged of its frauds. As It stands it is an impeachment of the patriotism of the men who saved the Union. It has been made a roll of dishonor against the earnest protest of honorable soldiers. Every name added to it by the present Commissioner is tainted with a suspicion of unworthiness,

It will be the duty of the Democratic President and Congress to revise the pension list in the interest alike of deserving veterans and of an imperilled Treasury.
