

Daily Democrat.

Ben Harrison is said to have cleared \$106,000 by his recent four years job.

The people voted for pension reform at the same time that they voted for tariff reform.

One of the large rubber mills consumes in the course of a year for the boxing of its goods 15,000,000 feet of lumber.

When Kansas sends "rebel brigadiers" to Congress it is high time for the Republican party to organize an expedition to search for new "issues."

The new union station at St. Louis will comprise a train shed of glass and iron the largest in the world, to cost \$1,400,000. The entire expenditure, including the cost of land, will be over \$5,000,000.

The first asylum for the insane established in this country was founded at Williamsburg, Va. in 1773, and was the only one in the United States until 1818, when the McLean Asylum Somerville, was incorporated.

The acknowledgement of the Independence of the United States by European powers was in this order: France, by treaty in February, 1778; Holland, in April, 1782; Sweden, in February, 1783; Denmark in February, Spain in March and Russia in July, 1782, and Great Britain in 1783.

The country expects the democracy to live up to its professions squarely. It does not ask that it temporize in any way or to declare while doing one way that it will presently do another.

It will have its commission and its authority to act. The democrats need have no fear of the republicans or any other party in 1896 if they will, through their representatives in congress, proceed courageously and directly to revise the tariff according to the conditions of today and not according to the conditions of ten years ago.

A SINGLE-TAX VOTE.

Mr Henry has received advices to the effect that an extremely significant vote took place in the New South Wales Parliament on Oct. 18 when the Protectionist Ministry only saved itself from defeat by voting against a resolution proposed by one of their own supporters and in favor of an amendment offered by the most bitter opponents of protection—the single-tax men.

It is becoming more and more evident every day that radical action on the land question cannot be much longer delayed, and with the evident design of testing the feeling of the House a protectionist (Mr. Chapman) introduced a resolution declaring for a progressive land tax on holdings over £1,000 in value.

This was opposed by Mr Cotton (Single Taxer), who declared that if a man holding land up to £2,000 in value was too poor to tax, it was clearer still that the man who owned no land at all and had only his hands to depend upon ought not to be taxed by additional duties, and who moved a straight single tax substitute declaring:

"That in the opinion of this House a system of raising revenue by the direct taxation of land values, irrespective of improvements, would greatly promote the welfare of this country."

In the debate which ensued it was evident that Mr Cotton's amendment would be carried when the Premier, Sir Geo. Dibbs, came out with the declaration that he should vote for Mr Cotton's amendment, and with a further declaration that the Government intended to press the local Government bill, which authorizes the municipalities to raise their revenues by a tax on land values without reference to the improvements on the land.

On division Mr Cotton's substitute was adopted in place of the original resolution by a vote of 49 to 13, 60, the leader of the Government and the leader of the Opposition voting for it, and it was then finally adopted by a vote of 49 to 10.

ABOURBON SURVIVAL.

Senator Hoar, of Massachusetts, has written another public letter. His last previous one was written from Europe at the beginning of the Presidential canvass, and was brimful of conviction that the American people would never, no, never, go back on the Force bill or the McKinley bill.

How well posted the Senator was kept during his absence we cannot say. He came home just in time to vote for Harrison and Halle. Probably there was no more shocked and disappointed person in the whole land—not excepting McKinley—than Senator Hoar when the people's magnificent verdict was known.

However, he has recovered sufficiently to write another letter, this time to the Home Market Club of Boston.

He is just as confident as ever that "we are the righteous" to whom the promise that they shall inherit the earth was given, "I shall certainly do all in my power to prevent bad legislation," he says. His simple creed is: All Republican legislation is good legislation; All Democratic legislation is bad legislation. It is enough for him, and he will never, never desert the Republican party.

There are today more than 200,000 women in the United States earning a living by professional and personal service outside that of mechanical labor or work in the shops, in the practice of law and medicine, the teaching of music and art, literature and science, and in clerical work of different kinds in Government and other official places.

Australia is entering the commercial world as competitor in a new line of production. Besides her contributions of mutton, wool and grain, she now offers the article of butter. Arrangements have recently been completed for shipping 200 tons of fresh butter weekly to the London market. It is preserved on the voyage by cold storage.

The Interior Department of the United States was established in the Spring of 1849. It was the first establishment of a new branch of the government since 1798, when the Navy Department was created. The first incumbent of the office was Thomas Ewing of Ohio, appointed by President Taylor.

Hood's Sarsaparilla which effected a perfect cure. Mr. Hauer is now in the best of health. Full particulars of his case will be sent all who address C. L. Hood & Co., Lowell, Mass.

A COMET STRUCK.—A few mornings ago the families of A S Bailey and S R McLean, living near Pendleton, were thrown into a state of intense excitement by a terrific explosion. For a time the incident was clothed in the garb of mystery, but now the puzzle has been solved. Says the East Oregonian: "The report was occasioned by a meteor which passed over Walla Walla at 4 o'clock in the morning, and was seen by a few parties who happened to be up at that hour. It is described as a beautiful and impressive sight. The ball of fire seemed about as large as the crown of a hat, and continually emitted a shower of sparks. It did not appear to the eye to be more than 100 feet high, and seemingly barely missed the tops of the tallest buildings. It traveled in a horizontal line southward, and shortly after it disappeared from view a report was heard like that of a distant cannon, followed by another of the same kind, and buildings were shaken by the explosion. That meteor is located somewhere between Pendleton and Walla Walla, and some one should get out a search warrant and find it."
