The Santiam Lumberman this week returns the compliments of the Mill City Gazette in an energetic manner. Egotistic wind bag, miserable liar and whining excuse for a man, etc. The close of the item indicates that there will be more fun: "Either crawl into your hole, or stand up to the rack and take your medicine, which will be in weekly doses, and so well shaken as to cause a rattling of dry bones in your sanctum."

The New York Sun says: "As a telling testimonial of the durability of its woods and an advertisement of its lumbering industries Oregon will send to the World's fair a number of shingles that have been doing service on a roof for over 25 years. They are of cedar, and were laid with five inches exposed to the weather. All that Oregon weather has done is to wear down the surface about an eighth of an inch; the remainder of the wood is sound and far harder than it was the day the shingles were laid."

The engine he spoke of would cost \$250, and can be handled by a very few men.—Dallas Transcript.
