

WASHINGTON LETTER.

From our regular Correspondent.

Washington, Oct. 2, 1893.

The key that will open the dead lock in the senate is being made, but the lock smiths are not working in public. It is evident that something of great importance is going on under the surface in the senate.

Should the expectation of disposing of the silver question by the 15th of this month be realized it is probable that congress will take a recess of several weeks.

The republicans in the house have up to this time shown a fear of the bill for the repeal of the federal election laws that is in some respects remarkable.

"Little Billy" Chandler made one of his usual exhibitions of himself in the senate Saturday afternoon, while speaking in favor of a resolution recently offered by him, calling on the secretary of the treasury for the authority under which he appointed the Fairchild commission.

The house committee on banking and currency is engaged in hearing arguments from members of the house in favor of various financial bills, including several for the repeal of the tax on state bank currency, which have been referred to it, and later outsiders may be heard both for and against these measures.

Neither Chairman Wilson nor anybody else can stop the flood of outright lies that are being sent out from Washington concerning the new tariff bill. Mr Wilson says of the latest, charging that the democrats on the ways and means committee were hesitating about making an attack on the McKinley atrocity, and that the committee had agreed that the new tariff should not go into effect until January 1, 1895.

Mrs Cleveland was out Saturday afternoon for the first time since the birth of baby Esther. Accompanied by the president she took a carriage drive. Beyond being a little paler than she usually looks she appeared to be in excellent health and was certainly in a jolly good humor.

There are many misconceptions about aluminum that are widespread, and which it seems difficult to correct in the public mind. Aluminum is not, section by section, a very strong metal. It is only one-half as strong as wrought iron.

A stratum of soil in eastern Nebraska has recently been discovered which is made up largely from volcanic dust. It is about eighteen inches deep, and of whitish aspect.

The bluebottle, fly discharges a not unimportant duty as a natural scavenger. Its larvae of maggots must devour large quantities of putrefying and decaying matter, and must therefore remove from the earth, a surface much material offensive, if not disease-producing, in its tendencies.

Saccharine has a rival. A new substance called valin is now being manufactured in Berlin, under a patent, and it is claimed to be two hundred times sweeter than sugar, and free from the objectionable properties of saccharine.

Hood's Cures

Sharp Pains Short Breath, Heart Trouble, Rheumatism.

Mrs. L. M. Paine, Eagle Creek, Oregon.

"I have lived here in Oregon for the past twenty years, and most of the time have been a very great sufferer from inflammatory rheumatism. I have also had what the doctor called heart disease, with shortness of breath and sharp pains in the left side. I decided to take Hood's Sarsaparilla, and before I had finished three bottles I was in better health than I had been for years. I do not have any pain now, sleep well, and to-day no woman of my age

Enjoys Better Health than I. At home on the ranch I not only attend to my family housework, but last summer I cared for and milked four cows. I do not feel that I can say half enough in praise of
