Writes Postmaster J. C. Woodson, Forest Hill, W. Va., "I had a bronchial trouble of such a persistent and stubborn character, that the doctor pronounced it incurable with ordinary medicines, and advised me to try Ayer's Cherry Pectoral. I did so, and one bottle cured me. For the last fifteen years, I have used this preparation with good effect whenever I take

and I know of numbers of people who keep it in the house all the time, not considering it safe to be without it."

"I have been using Ayer's Cherry Pectoral in my family for 30 years, with the most satisfactory results, and can cheerfully recommend it as being especially adapted to all pulmonary complaints. I have, for many years, made pulmonary and other medicines a special study, and I have come to the conclusion that Ayer's Cherry Pectoral occupies a position pre-eminent over other medicines of the class."—Chas. It seems to be conceded that the income tax will remain a part of the Wilson bill. Its opponents have done their worst against it and have failed. Even were sugar restored to the dutiable list it is unlikely that it would supersede the income tax, though this is the primary object of many who have been urging a restored tax on sugar.

While this is so The World does not hesitate to say that the income tax provided for in the Wilson bill is the most objectionable form in which it could be presented. To tax incomes of \$5,000 at the same rate as incomes of \$50,000 will have the effect, if it was not intended, of making the tax odious. The limit is too low. No income of less than \$5,000 per annum should be taxed at all. Incomes between \$5,000 and \$10,000 should not be taxed more than 1 per cent. Any deficiency this would produce in the needed revenue should be made up by a higher tax on the larger incomes. Any considerable amount taken from incomes of less than \$10,000 per annum is a levy upon the necessities and comfort of the people. For it must be borne in mind that "the necessities of life" is a relative term. Under modern conditions of living it can hardly be said that in taxing incomes between \$4,000 and \$10,000 per annum we are taxing only the surplus above what is required for necessities and comforts.

The World has long and consistently advocated a graded income tax, exempting all incomes of less than \$5,000, bearing very lightly upon incomes of less than \$10,000 and taxing only the needed surplus. It believes that such an income tax would be one of the fairest and least objectionable taxes that could be imposed by government. It would be a popular tax, for it would be objected to by few and would interfere with the comfort of none. It would challenge but a small part of the hostility evoked by the tax it is said to be in the Wilson bill. It would strengthen every party that introduced it into our fiscal system.

#### Over the Tariff Bill.

WASHINGTON, March 9. — Tomorrow morning the republican and democratic members of the finance committee will have their first bout over the tariff bill. A prominent member of the majority said this morning that he was confident that if there is a contest the democracy would come off triumphant. The republicans have said that they proposed to insist that the men who have framed the bill made public yesterday should assign the reasons for the changes they have made in the existing law. If this course is pursued the attitude of the democrats is known. They will say to their colleagues that the bill before them has been agreed upon by the majority as a wise and judicious tariff bill; that they are responsible to the country for it.

#### TRIBUTE.

While it is over thirty years ago since Alcock's Porous Plasters were first introduced to the medical profession and public, the marked success and unprecedented popularity which they met with not only continues but steadily increases. No other plasters have been produced which gain so many testimonials of high value as those continuously accorded to Alcock's Porous Plasters, and the only motive for these exceptional tributes lies in fact of their being a medicinal and pharmaceutical preparation of superior value. Additional proof of the true value of Alcock's Porous Plasters lies in the fact that they are being largely imitated by unscrupulous persons, who seek to deceive the public by offering plasters which they claim to be the same, "equal," "as good," "better," "best porous plaster," etc., while it is in general appearance only that they resemble Alcock's. Every one of the so-called porous plasters are imitations of Alcock's Porous Plasters.

Avoid dealers who attempt to pal a inferior and worthless plaster that is purchased by the public at low rates for the purpose of substitution.

#### Self Praise.

Self praise is no recommendation, but there are not times when one must permit a person to tell the truth about himself. When what he says is supported by the testimony of others no reasonable man will doubt his word. Now, to say that Alcock's Porous Plasters are the only genuine and reliable porous plasters made is not self praise in the slightest degree. They have stood the test for over thirty years, and in proof of their merits it is only necessary to call attention to the cures they have effected and to the voluntary testimonials of those who have used them. Beware of imitations, and do not be deceived by misrepresentation. Ask for Alcock's, and let no solicitation or explanation induce you to accept a substitute.

#### The Best of Reasons.

The reason why Alcock's Porous Plasters are popular is that they may be relied on to cure:

1. Lame back, sciatica, stiffness or twitching of the muscles
2. Chest troubles, such as pleurisy, pneumonia, consumption,
3. Indigestion, dyspepsia, flatulency, kidney complaint.

The success, however, will depend upon the genuineness of the plaster used. The popularity of Alcock's Porous Plaster has been so great that multitudes of imitations have sprung up on every hand. The only sure cure is to get the genuine Alcock's Porous Plasters.
