STAY AT HOME.

In several places in Oregon men have the South Africa fever. T E Brazill, writing from Johannesburg, South Africa, to a Seattle paper says: 'I am a foreman in a mine. My pay is \$75 per month; board \$25 a month without bed. This is no country for a white man. Negroes do all the hammer and drill work. Their pay is 62 cents per day. There are 50,000 of them working within thirty square miles of here. There are 1,500 stamp mills in one line of 50 miles. Each mill runs from 10 to 100 stamps. The rock is low grade assaying from \$3 to \$15 dollars per ton. It is sulphureous, and requires the McArthur process. The ledges have been prospected by diamond drills 2,000 feet deep. This is a prairie country. The soil is red sand and very poor. It will not produce without water. The Dutch Boers are a lazy, ignorant people. There are 70,000 and 80,000 of them in the Transvaal Republic. The negroes are worth nothing here. You can buy a good strong black for \$100. I will leave this country as soon as I can earn money enough to get away. There are a great many American miners here out of employment. Africa is no place for a tradesman or a laborer.'

THE ALL DAY prayer meeting at the United Presbyterian church yesterday was well attended. Christians of all denominations were present and the interest was great from beginning to end. A spirit of unity and christian fellowship prevailed. Such meetings cannot fail in bringing the people of God nearer to each other, and so there is power in united prayer, may we not hope for a great spiritual blessing as the outgrowth of this day of prayer. Rev Mr Little preached to a large audience last evening from the two fold subject: 'The wages of sin is death, but the gift of God is eternal life through Jesus Christ.' The wages of sin, both physical and spiritual were faithfully put, and making a very dark picture. But the pictures were illuminated when the speaker showed that these wages need not be accepted, but instead of death, the gift of God, which is eternal life through Jesus Christ, is freely offered to all. Service again tonight. All are cordially invited.

MISDEEDS

A Roseburg lady got taken in. A man at Medford advertised for agents to loan money. Mrs Elizabeth Snider of the former city answered the advertisement and was induced to advance \$40 to L L Angle on the strength of the matter; but no money came to be loaned. Then she had Angle arrested and he is now in jail. One needs to keep ones eyes open these days.

Storms ruined crops in the Palouse country, Wash., last fall, and many farmers are unable to pay the interest on their mortgages. They asked an extension of time until the next crops are harvested, but some of the loan companies closed down mercilessly. The farmers have organized a secret mutual protection society, and tell the agents of the money loaners to make foreclosures if they dare.

Don't Put It Off.

The necessity of a spring medicine is universally admitted. This is the best time of year in which to purify the blood, to restore the lost appetite, and to build up the entire system, as the body is now peculiarly susceptible to benefit from medicine. The great popularity attained by Hood's Sarsaparilla, owing to its real merit and its remarkable success, has established it as the very best medicine to take in the spring. It cures scrofula, evil humors, and all humors, biliousness, dyspepsia, rheumatism, headache, kidney and liver complaints, catarrhs, and all affections caused or promoted by low state of the system or impure blood. Don't put it off, but take Hood's Sarsaparilla now. It will do you good.

ARIZONA LETTER

PHOENIX, Ariz, March 17, 1894.

In a number of letters I have been asked 'What are the opportunities for labor in the southwest and how are wages?' Anything like an adequate discussion of these questions requires a knowledge of the causes antecedent to present conditions. But most writers do nothing but rant when this question is broached and I am not going to run the risk of doing any such thing, but stick as nearly as may be, to the narration of simple facts.

It is important to bear in mind several things in studying the question of work and wages here. The climate is always favorable, there are perhaps not ten days, in any consecutive 12 months, during which a man in health may not work in comfort, out of doors, without over-coating. During the summer months the 'philosophy of clothes' is answered by a dress that allows free evaporation and keeps out heat. Then again there are not a few Mexicans of the lower class in this region. These people, for the most part, have no ambition beyond existence. They live in hovels, exist on coffee, (a Mexican bean,) dry bread, coffee and cigarettes. The frijoles is to the Mexican what rice is to the Chinaman. These people do not find employment where intelligence is required. They answer where brute strength and endurance are expected and are well adapted to certain work in the hottest months. Again, this is the great cross roads for the army of tramps that are forever moving backwards and forward—north and west in summer, east and south in winter—not seeking work, yet always by their pestiferous presence affecting wages unfavorably for the industrious men. Recently, at Tucson, in the territory, a gang of 100 were herded at the depot and driven by the city officials aboard a passing freight train for free passage to nowhere. I saw one such sight with my own eyes. Men ranging from fifteen to fifty years, some singing, some cursing, some dozing, some munching—all seemingly resolved against honest work and avowed enemies of society. This condition of things I say affects unfavorably wages, even though the tramp is not properly a working man.

The kinds of work here offered are, first, farm work. The demand is not great, yet this is an agricultural region and destined to grow in importance as population increases. Include in the term farm work nursery work and irrigation. The wages paid are about one dollar per day and board. Many of the well-to-do farmers keep men the year round and their time is occupied attending to herds and flocks, irrigating alfalfa harvest and the sowing and harvesting of the ordinary cereals. The fruit industry is not yet developed, most of the orchards are young.

Some work is being done in railroad and canal construction. This, however, is an uncertain source of employment and danger. The Santa Fe R R is being built from Prescott southward to Phoenix and will reach the latter place within the present year perhaps. Seven hundred men are now employed, that number will not be increased materially. Then the San Diego & Phoenix R R is projected. But it is an uncertain quantity, quite as much so perhaps as the O. P. Canal construction is spasmodic and offers little inducement to the laboring man for that reason. Wages in these employments are usually about \$2 per day and board. Skill varies the rate of wages somewhat.

There are more or less mines in this territory, gold, silver and copper. The depression of the silver market has stimulated activity in gold and copper mining. I do not think the laboring man has many chances of finding a mine that will make him rich, there is an opportunity to earn wages as high as three dollars per day in some of the mining districts. This is a savor to fortune than the often dreamed of but seldom realized 'lomanza strike.' There are placer fields where fortunes have been found but the absence of water makes little activity in the silver mine districts, as only the very rich mine can be worked profitably at current prices. The uncertainty of the result in legislation at Washington is as bad in its effect, I think, as positively hostile legislation. This whole region is full of invalids and semi invalids who would like light employment for even a medium of wages. Clerks get from \$75 a month down to nothing. The better salesmen get of course the better wages. He is fortunate who as a clerk now gets a chance to earn a living. The summer season is dull in a business sense and the summer is, at the shortest, four months long.

Rents and prices are high it seems to me. Groceries, dry goods, clothing and books all come from ten to twenty-five per cent above Albany prices, and not infrequently they are double price. Something in the shape of a house rents for \$25 per month. Small rooms—say 8x10 feet rent for \$12 per month and upwards. Store rooms of the ordinary size rent for \$150 per month, I think, however, that the money value of prices is down. Larger railroad depots will equalize matters very much. My conclusion, therefore, are that this does not offer any special advantages to the laboring man for making money, to the man who wants a home under sunny skies; where he can live in comfort for an honest effort; where he can avail himself of the opportunities of being on the ground early and growing up with the country, and where he can enjoy health, happiness and comfort. Arizona offers many attractions. To the party in delicate health, saltling from throat, lung and bronchial
