Editors at Springfield—
About fifteen of the editors of the valley attended the meeting of the association at Springfield Saturday. E. M. Brown, of the Brownsville Times, is the only one reported from this county. Col. Hofer, the well known millionaire editor from Salem, was among those present. The U. O. was endorsed and much interesting business attended to. The association is a good thing and deserves the attention of the newspaper men of the valley.

A Substitute For Spectacles.

At a meeting of the Academy of Medicine in Paris Dr. Lesage recommended a novel method for reading print for the use of those who happen to have forgotten their spectacles. The method is to take a piece of paper and perforate it with a pin, making numerous small holes. This paper must be held close to the eye and the reading matter at a distance from the eye. A test of this method shows that it slightly enlarges the print to be read and that a book or newspaper can be held further away from the eyes than would ordinarily be possible to a near-sighted man who had mislaid his glasses. However, the method is useless for prolonged reading, being valuable only when one must read a few paragraphs.

Neighborhood Melody.

"Please, ma'am," said the little girl from next door, "mother wants to know if you will lend her four new mechanical tune players this afternoon."

"What an extraordinary idea! Is she going to give a dance?"
"No, ma'am. We're tired of dancing to it. She wants to keep it quiet for a couple of hours so that the baby can sleep."—Washington Star.

Sugar Water.

Eau sucree is said to dispel thirst more efficiently than any other drink, and it is simplicity itself. Put three large lumps of sugar in a tumbler with a tablespoonful of water and allow the sugar to dissolve, then fill up with more cold water. The French say that the perfection of this drink consists in letting the sugar first melt slowly in a small quantity of water.

Longest Sentence.

"It says here that the longest sentence in the English language contains 140 words," observed the old fogey.
"That's wrong," replied the grouch.
"The longest sentence contains only one word."
"What is that?" asked the old fogey.
"Life," replied the grouch.

Early Artillery.
The earliest artillery guns were made from wrought iron bars, bound together like the staves of a cask by the shrinking over them of iron hoops.—London Tit-Bits.

The love of self increases with the self.—Juvenal.

"Unwritten Law" Invoked.

Frankfort, Ind., April 26.—Having been acquitted of the charge of voluntary manslaughter in connection with the slaying of his young wife, William H. McCoy went on trial a second time today, facing the same charge in connection with the slaying of John Byerley, whom he found with his wife. McCoy probably will depend on the defense of temporary insanity which was successful in the first trial. The double slaying occurred in December 1914.
