\$865

f. o. b. Albany

This is the largest four-cylinder Overland that will be produced this year

The long, low streamline body is unmarred by angles or projections. From the rounded edge of the radiator to the full curved back, there is not a break in the lines. The hood slopes gently upward and blends into the beautifully curved cowl. The doors are flush, with hinges concealed and handles inside. The fenders are long and sweeping in their curves, with gracefully rounded surfaces. The running boards are clean and free from obstructions, the storage battery concealed, the tire carriers placed at the rear.

The windshield is built-in, and conforms to the curve of the cowl—a part of the car itself, not an apparent afterthought.

The car is superbly finished in rich, deep Brewster green, delicately striped with pure ivory white, and set off in pleasing contrast by black enameled radiator, fenders and running board shield.

Model 83 touring car is a beautiful car. It asks no odds of any car at any price—it is at home in any company.

75,000 4-CYLINDER OVERLANDS WILL BE BUILT THIS YEAR
