Was Fine Play

One of the best photoplays seen in Albany this year was "The Stinging," which was played at the Globe theatre this week. Very few people sat through the production dry-eyed. The influence of an attractive man in brass buttons over an innocent girl was brought out most strikingly and

her downfall and death reached to the depths of the souls of the spectators. It was a fine play, one that all parents should have shown to their children, and learned the lesson of slander taught in its lines.

ANCIENT MEDICAL SKILL

Peru Had Clever Physicians and Surgeons Ages Ago.

Both cocaine and quinine were first discovered and used by the prehistoric inhabitants of Peru, Ecuador and Bolivia. A cup made from the wood of the tree yielding quinine was filled with water and allowed to stand overnight. In the morning the liquid had become saturated with the medicinal properties possessed by the wood and its bitter contents were drunk. The quassa cups sold in drug stores in this country during the past century were the early method used to administer quinine.

The leaf from the tree giving cocaine is chewed today by the Indians living in the mountainous districts of Peru, Ecuador and Bolivia. It acts as a heart stimulant in those high altitudes and deadens the pangs of hunger so frequently felt by the half starved natives.

The Chumus, who lived in Peru, according to some authorities, 2500 years before Christ and whose dominions extended into Bolivia, Ecuador and parts of Brazil and Colombia, had a pharmacopoeia of their own. Most of the articles used by them as medicines are now used by the physicians of today. Their surgeons were highly skilled too. I have seen skulls dug up in their old cemeteries that showed their owners during life had been injured many times in battle by blunt instruments, presumably clubs, and their lives had been saved by trephining. I recall one skull with four silver plates, several with three, very many with two and hundreds with one. —Lentle's Weekly.

NOW IS THE TIME TO VISIT THE GREAT EXPOSITION IN SAN FRANCISCO

Come Along Folks;
See the Fair Early

Low Round Trip Rates Are In Force to the Mighty Panama-Pacific International Exposition at the City by the Golden Gate—Strange Tribes and Races From Far Corners of the Globe and Marvelous Exhibits Entrhall Millions of Visitors—One-Sixtieth of an Ounce of Radium Worth \$300,000 Produces Marvelous Plant Growth—Daniel Webster's Plow Is Shown—New Industry in Pearl Culture Exhibits by Japan—Strange Aeroscope Raises Higher Than Ferris Wheel—King of Siam Sends Huge Ebony Palace to San Francisco In Knocked Down Form—Samoan Divers Surprise by Great Time They Remain Under Water.

THE greatest exhibition the world has ever known, the great Panama-Pacific International Exposition at San Francisco, is today in full blast. Thousands of amazed visitors are viewing the world's most remarkable achievements in the industries, sciences and the applied arts. Visit the Exposition today and you can talk with your friends over the long distance telephone and hear

their voices far louder than they were spoken into the transmitting telephone. The voice is amplified by the marvelous Audion amplifier, invented by Lee de Forest. To put it untechnically, through the Audion amplifier the voice vibrations are increased in intensity by passing through a series of heat waves. A man in New York city today can talk to an audience in the Palace of Liberal Arts at the Panama-Pacific In-

ternational Exposition. It is possible to increase the intensity of the speaker's voice to such an extent, if necessary, as to fill a whole hall.

Among Japan's exhibits is shown the development of the pearl industry through the raising of a type of pearl developing oysters. The plow used by Daniel Webster is shown. In the German section Dr. Herman Lieber, the

famous chemist, portrays the utility of radium and its derivatives.

Strange wild tribes from French Somaliland, on the Zone, the great amusement section, give marvelous exhibitions of their prowess with the spear. These warriors are of the same intrepid type as the Algerians serving in the French army. The world's woman champion rifle

shot, Princess Winona, gives marvelous exhibitions of her skill. Dancers of all nations reproduce the famous Turkish and Egyptian dances which fascinated thousands at the great world's Columbian exposition at Chicago and display the latest steps practiced in the royal courts of the Orient.

In the aeroscope visitors enter a car

resembling a two storied houseboat and are swung 264 feet in the air at the summit of a lofty inverted pendulum. The Exposition offers the most comprehensive epitome of the world's progress ever presented. The man from any land who goes there may say, "I am on my native soil." The remarkable photos on this page show scenes never before presented from the Exposition.

Sisters Gervasia, Francis, and Hildegard, left this morning for Mt. Angel, where they will remain for the next few weeks.
Mrs. M. J. Peery went to Portland on the morning train.
