The prize for the best dairy cov was awarded to Brown Bess, owned by Ed Derry of this city. The showing is very high, indicating a fine animal. The test the first day was 15 pounds in the forenoon and 20 in the evening, the second day 16 pounds in the morning and 17 in the evening. The butter fat tests ranged from 4.6 to 6 remarkably high. Figures showd the income of the cow for two days to be \$1.35 for buter and 20c for milk. Total, \$1.48. For a month of 30 days that would be \$22.20.

Statement of Fair Board.

Everywhere one hears the comment that the exposition and fair which losed on Saturday night was a grand success, and that it was one of the most successful undertakings that has ver been pulled off in this section of the valley. As one looked over the different exhibits it was hard to decide which one should be placed first. The exhibit in the building, as well as the city of Albany, It was a surprise to everyone to see what was accomplished in so short a time. This was made spossible only because of the general cooperation of the people of this community and the surrounding country. The farmers and manufacturers deserve a large amount of the credit that is due for the fine exhibits that were made in these particular lines. The exposition demonstrated what can be done by cooperation in our own community.

The board would take this opportunity to thank each and every one who had a part in bringing about these grand achievements, and to express to them their heartiest appreciation of the efforts that they have put forth towards accomplishing these magnifi-cent results. The board is especially grateful to the superintendents of the various departments who have done so much towards making the fair a success. The board would also express its appreciation to the local press, to the Agricultural College and to the two railroad companies for the assistance they have rendered in this undertaking.

With the same cooperation on the part of the people of this county and surrounding counties, the Central Willamette Valley Exposition and Fair should in another year be made (in the words of Governor Withycombe) "One of the biggest and best

fort of the past few weeks has demonstrated what can be done by cooperation.

The exposition board expects to send checks in payment of all premgent. 1st; Effie Lytle, Shedd, 2nd; iums within the next ten days. Further announcements along this line will be made in the local papers.

OFFICIAL BOARD.

ODESSA'S RAPID RISE.

In Commerce and Intellect It is .he Capital of New Russia.

on is one of the most important seaports of Russia, ranking, by reason seaports of Rossia, ranking, by reason of its population and its foreign trade, after Petrograd, Moscow and Warsaw. Since it was founded in 1704 near the rulus of a Turkish fort that fell into Russian hands in 1780 it has rapidly become the intellectual and commer-cial capital of what is called New Russis. It is the principal export town for the extensive grain growing dis tricts of south Russia, the see of an archbishop of the Greek Orthodox church, the center of a fine university and the beadquarters of the Seventh

army corps.

The port lies on the shore of the Riack sea, about midway between the estuaries of the Dniester and Dnieper, 967 miles from Moscow and 381 from Kiev. The city is built facing the sea. on low cliffs, seamed with deep ra-vines and hollowed out by galleries in the soft rock, in which thousands of the poorest inhabitants live. But above this are fine broad tree lined streets and squares bordered with handsome Italian style and good shops. Beside the cathedral there are dozens of othe churches, a fine opera house and the Paints Royal, which is a favorite place of resort.—London Chronicle.

LIFE ON SWAN ISLAND.

Probably the World's Most Isolated

Swan island, in the Caribbe sea, is situated what is probably the most isolated wireless station in the world. The station crew is made up of three operators, two engineers,

No women are permitted to land on the island. Men who express a will-ingness to go to Swan island are obliged to sign a contract whereby they agree to remain at least eighteen months or waive their right to free return transportation. Those remaining homes by way of one of the Central American ports and are granted six weeks' vacation with full pay.

Strangely enough, there is no diffi-culty in obtaining men to man the sta-tion. Applicants, indeed, exceed the number of vacancies. Board and lodg-ing, of course, are supplied, a boat bearing all provisions necessary, inwell, arriving regularly every two weeks. Some men have remained on the island as long as two years and a half and, subsequently, have been glad to return to the station.-Philadelphia

Six Follies of Science.

The six follies of science are the squaring of the circle, perpetual mo

tion, the philosopher's stone, the eligit of life, magic and astrology. In all ages men of undoubted ability have toiled early and late to unravel the mysteries supposed to be connected with these fuscionting problems. It is not always remembered that such intellectual giants as Bacon, Sir Robert Royle and Sir Isane Newton sough the philosopher's stone. In the study of astrology Lilly was for a time even

pensioned by parliament.

Most of these "follies" conferred in direct benefits upon science, for in seeking one thing their devotees discovered many another. The craze for the secret, or unknown, has still its hold upon men and is seen in paimis try and kindred cults.—Exchange.

Cactuses of Arizona

Arizona has more than a hundred kinds of cuctuses, and Tucson is the center of the great cactus region of the southwest. These odd plants range in size from the noble sahmara, or glant pincushion excluses an inch or two in diameter Sahnaras grow in great abundance in the footbills between Tucson and Yoma and are always ob-jects of wonder. It is believed a large plant is at least 200 years old. The point is at least 200 years old. The fruit begins to ripen in June and is gathered in great quantities by in-dians, who make fine jam and also a pressed sweetment of it.

Why He Laughed.
"What are you laughing at?"
"I was just thinking of my poverty."
"Well, what is there in poverty to

make you taugh?"
"It just struck me that if I should by chance strike it right some day how many thousands there are who could honestly say they knew me when i didn't have a dollar."-Detroit Free

Gem Superstitions. It is said that the amethyst used to

be worn to promote temperance and sobriety, the chrysolite to ward off fe-vers, the onyx worn round the neck to prevent epilepsy, the opai to cure weak eyes and the topaz to cure inflamma tion and keep the wenrer from sleep

Making Things Even.
