Everything---more than was ever thought of before ---can be obtained for Hallowe'en decoration. Come in and acquire enthusiasm and ideas from our stock of Hallowe'en novelties

THE ALBANY ART CRAFT

Portland Cement.
In the manufacture of portland cement, clay or shale and limestone are ground together and "burned" in rotary kilns. The cement comes from kilns in the form of hard, black, semi-vitreous lumps, or "clinker." When pulverized this clinker becomes a grayish powder, which is the familiar article of commerce employed for a great variety of purposes in practically every type of building construction. It has long been known that the fineness to which the cement is ground is one of its most important characteristics, and consequently specifications require that 75 per cent or more of commercial cement shall pass through a No. 200 sieve, which has 40,000 openings per square inch. This is the practical limit of mechanical sieves in respect to fineness, for although finer sieves can be manufactured the necessary uniformity in size of openings cannot be attained. It is well known, however, that the minute particles of cement, which are just capable of passing through the openings of a No. 200 sieve, are still too large to be of value as cementing material when mixed with water. Hence the really valuable portion of the cement consists in the extremely fine powder, the amount of which can only be inferred from the sieve test.

Sacred Mushrooms.
The "sacred mushroom" of the Aztecs, which was called by them teonanacatl and used as an intoxicant, was, according to investigations recently reported, not a mushroom, but the narcotic cactus, *Lophophora williamsii*, now well known for its use by the American Indians in religious ceremonies. It is popularly called "mescal bottom," though a better name is peyote. Early writers on Mexico described it as a mushroom, and this notion as to its botanical status still survives. The mistake is due to the fact that in one of the two principal forms in which it is prepared the head of the plant is cut off transversely, and when dried it bears a close resemblance to a mushroom. In its other form it is cut longitudinally or in irregular fragments and was described by early writers as *raiz diabolica*, or "devil's root."

Analyzing a Master.
De Quincey, who wrote the "Confessions of an English Opium Eater" and other works now considered classics, was a strange, ill balanced person. Vernon Lee says of him that he had an incapacity for holding his tongue on irrelevant matters, which is a sign of intellectual weakness. He had also a marked incapacity for keeping his irrelevant emotions especially the vituperative ones to himself, which is a mark of moral vulgarity. He had a manifest tendency to talk big and at the same time to mix slang with grandiloquence in situations where no humorous effect could be obtained by this proceeding. Yet withal these traits are redeemed by his great subtlety of thought, his tragic depth of feeling and occasionally his marvelous power of seeing and saying.—New York Telegram.

Breslau's Checkered Career.
This history of the possession of Breslau shows that it has changed hands very often. Early in the eleventh century it was made the seat of a bishop and after having formed part of Poland became the capital of an independent duchy in 1163. In 1335 it was purchased by John, king of Bohemia, who retained it until 1400. It then changed hands and became subject to Bohemia once more in 1400, passing with the rest of Silesia to the Hapsburgs in 1526. It came under the authority of Frederick the Great in 1741 and was recovered by Austria in 1757 and regained by Frederick in the Seven Years' war. It has since been Prussian, except a few days in 1807 and again in 1813, when it was held temporarily by the French.

Our Army Rations.
The average daily field ration of the United States army is made up as follows: Bacon, 12 ounces (or fresh meat, 20 ounces); bread, 18 ounces; beans, 24 ounces; potatoes, 20 ounces; prunes or preserves, 1.28 ounces; coffee, 1.12 ounces; sugar, 3.2 ounces; evaporated milk, 5 ounces; vinegar, .16 of a gill; salt, .64 ounce; pepper (black), .04 of an ounce; lard, .61 of an ounce; butter, .5 of an ounce.

At the Zenith.
"Pa, what does it mean when a public man is said to be at the zenith of his popularity?"
"It means, my son," replied the defeated candidate ruefully, "that he is about ready to hit the toboggan."—Birmingham Age-Herald.

Love's Progress.
Knecker—How can you tell how long they have been married?
Bocker—By whether she wants him to stop smoking to save his health, his money or the curtains.—New York Sun.

Scant Courtesy.
Opportunity came knocking at the door.
"I'll give him two minutes to explain his proposition," said the great magnate.—Kansas City Journal.

Iguazu Falls.
More than twice as wide as Niagara and fully fifty feet higher, the falls of Iguazu, in South America, is one of the great wonders of that continent.
Skeptical.
Madge—You don't believe all you hear, do you? Marjorie—Gracious, no! Why, dear, I don't even believe all I say.—Judge.
