#### MORE LOBBYING.

The Commoner: In 1913, soon a ter taking office, President Wilson electrified the country and started stampede out of Washington, when be charged that the capital was infeste by an "insidious lobby" which he wa determined to smoke out. The hegir which followed this presidential warning left Washington hotel men to mourn the god old times. There was naver before such a hustling to get out of the City of Magnificent Dis-

But the "insidious lobby" of 1913 was a negligible force in comparison with the more insidious lobby which now infests the capital. The lobby which chailenged presidential attention in 1913 and which fled before the scourge which the White house brought into view was frankly sel fish. It was there merely to get all that was to be had for the railroads for steel, for sugar, for glass, for ship yards, for powder mills, for gun fac-tories, for lumber and for all other pets of privilege which republicanism had been nurturing for so many years.

The hotel business in Washingto was never so poor as it was in 191. and 1914. But it must be improvin For there is another and a infinitely more dangerous lobby in festing the capital of the nation day. It is a purely "patriotic" lobby a lobby which has wrapped the flaabout it, a lobby profoundly concern ed over the welfare of the nation an the perpetuity of our sacred institutions, a lobby which is in deadly fea of some imaginary foe, a lobby the thinks in terms of air ships, subm rines, dreadnaughts, 16-inch guns, tor pedoes, shells, a huge standing arm and a navy greater than a Hobso

ever dared to propose. Even the railroads when carryin; forward their successful campaign to force the government to permit a increase of freight rates, flooded th mails with no such a deluge of liter-autre as that which the Preparedness lobby is today disseminating. Neve before in the history of the countr has an equal activity in any behalf been witnessed. Evidently this lobby is richly endowed. It is magnificently organized. It is splendidly equipped And it is carrying forward its work with a thoroughness and with an indifference to the cost which may well challenge the curious interest of the American people who are being asked to approve of vast expenditures on the "national defenses," the implication being that our shores are menaced by

some powerful oppressor.

The ramifications of this lobby ar widespread. Scores of leagues, so cieties, clubs and associations have been formed to push particular phas es of the general campaign. There are national security leagues, national rifle associations, national nereo club and national organizations of variou sorts designed to arouse the country to some impending peril and to bring it to a realizing sense of what is ex pected of it in the way of funds for buying battleships, cruisers, dread naughts, submarines, destroyers, ai craft, powder, war material and equipment and for the increase of army and navy to a war footing in a time of pro found peace. Schools, churches, po litical organizations, the magazine and newspaper press, chantauquas, the ly ceum, everything which contributes to the molding of public opinion, is being utilized by this lobby as far as possible in spreading the gospel of preparedness and in dragooning popu lar sentiment into an acceptance of the fantastic notion that preparation for war is a guaranty of peace.
