

The effect upon the foot, muscles, arch and bones of the foot of ordinary shoes is to lessen the toe room, cramping the toes and changing the position of the bones from that intended by nature. Ground Gripper shoes have sufficient space for free movement of each toe, such as enjoyed by the barefoot child or Indian. As the weight of the body falls upon the foot the toes spread and as the body is raised they contract, grasping the sole of the shoe to give power and motion to the forward step. The shape of the sole of these shoes are exact outlines of the perfectly normal foot.

Ground Gripper Shoes for Correcting All Foot Troubles

We now have shoes, so constructed that they will cure by natural development of the muscles, foot troubles. They are the

Ground Gripper Surgical SHOES

Normal feet are not pointed in the middle or at the toes. They are longest on the inner side, and the end of the shoe should never be pointed, but should lie over the normal position of the great toe, toward the inner side. The weight of the body should be thrown on the outside, which is by far the strongest. Instead of holding the muscles of the arch in a fixed position, these shoes exercise the muscles and strengthen the arch, by means of a flexible shoe. Calluses, bunions and other forms of foot troubles are positively cured by proper exercising of the muscles.

Not merely a temporary relief, but a permanent cure is effected. The foot is the shape of a normal foot. A rotor heel puts a gentle, constant pressure on the portions of the foot that are not properly placed, and cause them to go back to where they should be. Toes are straightened, bunions removed, corns cured, calluses eliminated and other troubles corrected by natural developing of muscles.

What Ground Grippers Will Do for You

- 1—Make you walk parallel.
- 2—Exercises all of your foot muscles.
- 3—Give your blood circulation.
- 4—Relieve pressure and nerve affection.
- 5—Prevent and cure flat foot.
- 6—Strengthen ligaments and muscles.
- 7—Swing your great toe on a straight line.

- 8—Reduce bunions or swellings.
- 9—Balance your body weight.
- 10—Straighten out deformed bones.
- 11—Make weak ankles strong.
- 12—Prevent toeing outward.
- 13—Arch exercise at every step.
- 14—Make deformed feet normal.
- 15—You are getting medical treatment by wearing "Ground Grippers."

We now have men's and women's sizes in these Surgical and Walking Shoes. Experienced shoe men who have personally tested them will be glad to explain more fully and let you try them. You will be under no obligations to buy. Just ask to see the Ground Gripper Shoe.
