The table for the senior class officers was adorned with pink LaFrance roses, the senior class flower. The Best Possible Investment

Buying a Buick Motor car is closely akin to buying a good farm or a good bond. A Buick Motor car is what the bankers call a cash asset. There are thousands of bankers who would just as soon lend money on a car load or a trainload of Buick Motor cars as on the best farm land. The man or woman who buys a Buick Valve-in-Head motor car takes no chances. There is no risk involved. It is an investment that is safeguarded at every turn, and one that will yield a great return—in health, in pleasure, in satisfaction of ownership, in prestige, and in freedom from doubt and worry—as any investment that could possibly be made. Buick Motor cars have backing of the most substantial sort. They are constructed on engineering principles that were conceived when the motor car industry started, and which have gained steadily in public favor and the best expert opinion ever since. They are endorsed by the more than a quarter of million men and women who use them. A Buick Valve-in-Head motor car is a strictly gilt-edge investment.
