The ninth annual Chautauqua assemblage has begun this year with good attendance and support by the people. ## FAY MORVILIUS COMING HERE

Boston Contralto to Sing With  
Hungarian Orchestra at  
Chautauqua.

With the marvelous growth of western Chautauqua managers have been able to steadily increase the quality of programs offered and to bring artists never before heard on a Chautauqua.

Among the foremost musical attractions this year is Mme. Fay Morvilius, mezzo-contralto, discovery and protegee of Mr. Louis Elson of the Boston Conservatory of Music. She is the soloist who appears at Chautauqua with Witelski's Royal Hungarian Orchestra.

Mme. Morvilius is a delight. Her sweet naturalness of manner and ra-

diant charm are instantly felt wherever she appears. She has much to give and gives it all. She loves to please and is generous with those home ballads so dear to every heart. Although thoroughly familiar with the French, German and Italian tongues in her operatic career, she prefers to sing in English. She sings with wonderful distinctness of enunciation. Her auditors get the words and stories of her songs as clear as the deep, rich, colorful, dramatic quality tones of her voice.

## Community Development Is Sias' Hobby In Life

Man Who Originated Slogan of "Bury Your Hammers and Buy Horns" Coming to Chautauqua

ERNEST J. SIAS, community development man, originator of the slogan, "Bury your hammers and buy horns," is a primed "pep" promoter of progress. He knows that the range of an idea, like a bullet, depends on the power behind it. The "slights" are all raised on his artillery. He puts a "crimp" in the crank, loosens the skin of the hidebound and whips a town into boosting form.

have such perfect heat insulation that the heat generated is concentrated on the food and not on the cook.

The G-E range does perfect work because of the positive and exact control over temperatures which its construction gives to the operator. Furthermore, all vapors and natural juices are retained and cooked through the meat with their full flavor and nutritive value. For this reason, also, shrinkage of food is less.

Let us demonstrate to you what the G-E range will do
