Give the Wife Her Fair Share of the Crop

The proceeds of this year's crops will go to help buy certain new equipment for the farm and home. Don't forget the woman's department in your planning. Surprise the wife or other women folks by suggesting a new kitchen range. They have shared in the work for the crops—why not let them share in the profits?

Nothing she could select would have such an effect on her work as

A MONARCH RANGE

It saves time, saves steps, saves work and worry and listen, Mr. Man!—It saves fuel too—soon actually paying for itself. After that the saving is "velvet."

While you're thinking about it, drop in and look them over. You'll understand then some of the reasons for these things we claim.
