Novelty Shoes

A few shoe manufacturers are now making novelty shoes on an 18 day schedule, that is to say: A merchant can receive shoes within three weeks after the order reaches the factory.

We are pleased to state that we have received today several novelty styles from an advance line of shoes that we bought on an 18 day schedule.

8 in BOOT with black kid uppers. Louis heel. Priced at \$7.50

8 in. BOOT, Russian tan vamp, with ivory wash kid top, Louis heel. A very popular combination. Priced at \$7.50

BLACK CALF SHOE, 18 in, made on the custom last, with a castor buck top, 1 1-8 inch heel. Priced at \$6.50

BROWN CALF SHOE, 8 in, with tan buck top which makes a very pleasing combination. 1 1-8 inch heels. Priced at \$6.50

WE HAVE ALSO RECEIVED THIS DAY SEVERAL STAPLE STYLES OF MISSES AND CHILDREN'S SHOES.

Among them are some high top button gunmetal shoes with neolin soles. Other button shoes with patent vamp and gunmetal top.

HERE'S ANOTHER

A button shoe with full gunmetal vamp, with heavy mat calf upper, and extra oak soles. In sizes for children, growing girls and misses.

These shoes cost a little more but they have nothing but the best materials put into them on account of this shoe such an excellent one, we feel sure that your children will be protected from the wet and the saving in doctor's bills will more than recompense you for the extra cost of the shoes.

which is not natural and you can prove it to yourself by naming over the large cities in any state you happen to think of.

I can't help comparing the Sacramento river territory in California with the Willamette river territory in Oregon. It seems to be the geography is almost identical. Sacramento and Stockton are large manufacturing and commercial centers. They have always had the same railroad rates as San Francisco.

Now, the causes of our abnormal situation may be and no doubt are, various but may it not be that the railroad rates are the primary cause of our failing to keep pace commercially with the development of our resources.

Power of Cooperation

In the absence of Fletcher Linn, of Portland, Senator E. D. Cusick on short notice gave some excellent suggestions. He told of what it had done in this city in the past, recently the associated charities, a railroad, furniture factory, etc.

He told of the present status of the Lebanon paper mill, brought inside the city to secure the taxes on it, and then taxed to such an extent there is talk of closing it.

In the matter of bonuses, those who are benefitted the most, real estate owners, give the least, and instead of a few furnishing the money it would be better to levy a tax direct and let all share the expense. He considered the prospect good for development here of other interests than a prospective road into the timber belt, such as the pulp business.

Power and Water.

Ex-Mayor P. D. Gilbert spoke on the subject of power and light, declaring that too much is paid for power, and that a lower power rate means greater development and encouragement for new industries. He gave it as his opinion that Albany should have its own power and light plant, and should begin within sixty days to secure a gas plant. He gave it as his opinion that Albany could be run without the levy of a mill.

Matter of Insurance.

M. Senders spoke of the necessity of good insurance, needed in credit and for security. There are two kinds—mutual and stock. The best is the cheapest. There are two kinds of stock, board and non-board. A new system of insurance is the co-insurance, in which the insured helps carry the insurance, all right in full value insurance, but doubtful at 50 per cent.

The banquet closed with the announcement of a discussion of the subjects at the commercial club in two weeks.

Real Estate for Sale

Bargains in farm lands, city property; money to loan, insurance written in the strongest old line companies. Call on J. V. Pipe, 202 W. 2nd St.

Born—

Word was received in this city this morning of the birth of an eight pound girl to Mr. and Mrs. G. A. Richards at their home in Portland. All doing well. Mrs. Richards was formerly Miss Florence Smith, who lived in this city before her marriage.

Drove to Portland—

This morning Mr. and Mrs. Carl Anderson left for Portland in Grant Pirtle's Reo. They will visit a few days at Mr. Anderson's parents' home before returning to continue their visit with Mrs. Anderson's parents, Mr. and Mrs. Grant Pirtle.

Colder Weather—

The mercury dropped five degrees colder last night and the official government instrument kept by F. M. French shows that 19 was the coldest part of the night. The maximum yesterday was 46, but it is thought that 40 will be the warmest point reached today. So far little damage has been done, no serious reports having reached the city. Some potatoes are still in the ground, but they are thought safe. Some that are not stored carefully may be nipped a little, and some apples that were in exposed warehouses have been frosted.

Appointed Delegate—

A. C. Schmitt has been appointed by Gov. Withycombe as delegate to a national conference of marketing and farm products, at Chicago, July 4.

Ford People—

J. L. Van Huffel, master mechanic, and S. G. Evans, sales manager, of the Ford Co., at Portland, are in the city today, the guests of W. W. Crawford, the local agent, while doing this part of the valley, making Albany their headquarters. Mr. Crawford has just received the largest car of Fords ever received here, ten in one car, and all of them have gone alrady.

Thompson Baten—

Geo. T. Baldwin, dem., defeated W. Lair Thompson, for joint senator of the seventh district, consisting of Crook, Jefferson, Klamath and Lake. Thompson was president of the last senate, and, it is said would have been a candidate for the next. As he is eliminated it is said Gus Moser will be run, which will insure boss rule in the interest of Portland.

Arrived from Medford—

J. D. Sears, wife and two sons have arrived from Medford, preparatory to

making Albany their home. Mr. Sears has bought the grocery store of the Beam-Hogan Co. He has the reputation of being a live wire, and Albany is glad to get all the live wires possible.

Left on California Trip—

Mr. and Mrs. Orin Judd, of Detroit, left last night for Long Beach, Calif., where they will spend the winter, after the warm weather of the city. They were there last winter also.

This Cold Wave—

Having cold weather here in November, is easily explained. We are getting the tail end of the freeze.

Set on the Election—

Two boys were heard talking on the street. One of them remarked: "Yes, I bet some on the election. I have 20 cents scattered around in different places."

Wearing Good Clothes—

C. G. Rawlings is wearing a fine \$27.50 overcoat and a new hat. Albany people have learned that Mr. Wilson has been reelected.

Theda Bara Again—

The story of a woman who deliberately takes the place of another she believes dead, and is called to account after she has fallen in love with the man who befriended her, makes Theda Bara's new photoplay for William Fox one of exceptionally gripping heart-interest. In "Her Double Life" at the Rolfe theatre Friday, Miss Bara plays the part of Mary Doone, who begins life at a disadvantage, as a child of the slums. She works her way to a high position in London Society—then comes the discovery, and all is over.

CHILDREN'S SCHOOL SHOES

We are better prepared than ever to supply your wants in this section, and at the same old prices. While other store are advancing prices every day, ours remain the same. Buying in advance for our 125 Busy Stores for cash—that's Why.

Albany's Water Supply

For the purpose of supplying Albany with wholesome water the Oregon Power Company constructed a modern filtration plant in 1912.

Not far from \$100,000 was expended to guarantee the safety and healthfulness of the water supply.

If a natural, or gravity, system of water supply were practicable such a system would have been built instead of the filtration plant.

The filtration plant has operated successfully, as proven by the absence of a single case of typhoid or any other disease traceable to the water supply.

Operation of the plant has met with every accepted sanitary and scientific requirement, and has been given the vigilant, careful and painstaking attention deserved by a matter of vital public concern.

Frequent bacteriological tests of the water bear out scientifically the entirely satisfactory results of the method selected to give this city a water supply above reproach.

One of the more recent tests was made by Dr. David N. Roberg, State Health Officer, who reported the water to be of high quality.
