

Hart Schaffner & Marx new belt-back Varsity Six Hundred

The little red book on etiquette states that it isn't polite to turn one's back on people. But you can't blame this young man for turning his back on us—the belted-in effect of this Varsity Six Hundred overcoat is very much worth showing.

There's a free and easy swing to this coat that young men like.

We'll show you some other stylish variations of these famous overcoats.

Bandon—Old Eagle mine near Bulards changes name to Platina Y Oro Mining Co. and output will be increased to 200 tons daily.

Astoria—With 100 acres of cranberry marsh, part of which is now bearing, Clatsop county expects to make a dent in the future cranberry market.

St. Johns—Providing for future business, the Standifer-Clarkson Co. is to have four sets of ways at the North Portland harbor plant, located on property adjoining that of the Monarch mill.

Junction City—Carpenter—Chambers setting up sawmill west of here

to cut 60,000 ties as sub contract to the Menefee Lumber Co. of Portland who have orders from Oregon Electric, North Bank and affiliated lines for 160,000 ties.

Oregon and Washington tide water mills shipped 34,212,787 feet of lumber during October.

Astoria Flouring Mills Co. awards contracts for \$30,000 worth of additional machinery.

Grants Pass—Improvement company to be incorporated to supply water to land owners in district north of river.

Portland—Northwest Steel Co. contemplates adding \$1,000,000 rolling mill to their plant, several hundred additional men would be employed.

Florence—Capital to be enlisted for shipbuilding plant here.

Portland to have another motor car assembling plant on East side.

Henryville—Coal mine here leased and will be operated.

Rock Island clubhouse in Willamette river to be built.

Portland—Monarch sawmill sold and million dollar rolling mills planned.

Lincoln county may bridge Yaquina river near head of the bay.

Electricification of S. P. line from Whiteson to Corvallis to be complete January 1.

Grants Pass, Nov. 11 celebrated es-

tablishment of sugar beet industry.

Mill City—Frank Potter will build shingle mill here.

Dallas—J. K. Armsby Co. has million pounds prunes awaiting shipment.

Pendleton Woolen Mills booked \$20,000 order for marching uniforms.

Roseburg—The O. & C. land grant lands are to be thrown open in 1917.

Oregon wool has recently sold in Portland for the highest price in history of the state.

BUSINESS BETTER.

So Says a Roofing Dealer of Portland On a Trip Through the Valley.

Eugene Register: Business conditions in Oregon and throughout the northwest are greatly improved in the opinion of Lewis Switzer, traveling representative for the General Roofing Manufacturing company, who has been in Eugene for several days. This condition, he thinks, will continue, and he says his company is having more difficulty in filling orders than in getting them.

The demand for the products of the General Roofing company, Mr. Lewis thinks, is due in large measure to the continuous advertising policy that has been followed. It took nerve, he says, to go into the dark days of 1914 with a heavy advertising appropriation, but it was done and the results justified the expenditure.

Case Advanced. (By United Press)

Washington, Nov. 20.—The supreme court granted a motion for advance for argument of the case of Werner Horn, an alleged German army officer, and dynamiter. Horn, it is alleged, attempted to dynamite the international Canadian-American bridge in Maine. It asks a writ of habeas corpus, claiming the charges to be of a military character that prevents ordinary civil courts from trying him. The case will be argued January 8.

Used a Real Circus—

For the presentation of "The Clown" which will be seen at the Globe for the last time tonight, with Victor Moore, the celebrated comedian, in the title role, the Jesse L. Lasky Company rented an entire circus for three days. This traveling organization happened to be playing near the Lasky studio at the time the picture was being produced and was promptly secured with all its performers and equipment. To secure the audience, the Lasky company merely announced in the daily papers that the citizens of Los Angeles were invited to be their guests at the performance and hundreds were turned away. Victor Moore played the role of the principal clown, but his main support was made up of the regular artists of the circus.

Between Girls.

"She says she wishes she could see herself as others see her."
"That's just an excuse for spending a lot of time in front of a mirror."

SHASTA ROUTE ONE OF MARVELOUS SCENERY

Interesting features of the Shasta Route as viewed by passengers are:

The Willamette Valley, one of the important agricultural valleys of the Pacific Northwest, comprising about 4,000,000 acres. It is 150 miles long with an average width of about 40 miles. A broad beautiful valley dotted with farms, orchards, villages, towns and modern cities. Evergreen forests cover the foothills while the line of the Cascade Range to the East is broken at intervals by those noble peaks Mt. Hood, Mt. Jefferson, The Three Sisters.

Portland, the Rose City, population 275,000 and a lumber and shipping center, is also a distributing point for an area comprising 250,000 square miles.

Salem, the capital of Oregon, and one of the oldest cities in this state.

Albany, the Hub City, where connection is made for Corvallis, home of Oregon Agricultural College; Newport, on the Coast, or for the Mt. Jefferson country to the East.

Eugene, in the upper Willamette valley, junction point for Coos Bay points. Eugene is a city of 8,000 inhabitants, the home of the University of Oregon. A beautiful, prosperous and thriving city.

The Umpqua Valley, the third important agricultural valley in Western Oregon. The metropolis of this valley is Roseburg, a center of considerable importance.

Cow Creek Canyon, a wild, rugged, picturesque and interesting canyon. All this occupies the first day. During the night No. 15 passes through the Rouge River valley, crosses the Siskiyou and Shasta Mountains, and next morning is in the upper Sacramento Canyon.

This is a rugged, beautiful and interesting canyon. Leaving this canyon we shortly pass into the great Sacramento valley, a valley comprising about 12,000,000 acres. It is 160 miles long—one of the most important agricultural sections of California. To the east is Mt. Lassen, the only active volcano in the United States.

In mid afternoon the train is ferried across Carquinez Straits from Benecia to Port Costa. Train passes thru the edge of Berkeley and Oakland, thence to Oakland pier where passengers embark on large comfortable ferryboat for San Francisco.

Regniers Tonight—

Tonight the Regniers will be heard at the Baptist church in the regular Y. M. C. A. lyceum course. They are a very versatile and talented couple, presenting a program of impersonation and music of rare merit. It is full of laughs and clean humor.

Exide Battery Service Station

Starting and Lighting batteries, for all cars, for sale.

Something About Water-Purification History

The filtration of municipal water supplies dates back 87 years, the city of London constructing the first large water purification plant.

The first municipal filtration plant in the United States was built at Poughkeepsie, New York, in 1875.

At present no less than 49 per cent of all the people in the United States living in communities of more than 2,500 are served with filtered water.

In other words, upwards of 18,000,000 people in this country use water which has been treated by filtration processes, and which is thus reasonably guaranteed to be safe and healthful.

Of this number more than 12,000,000 are served with water purified by the same type of filtration as that successfully employed here in Albany.

George A. Johnson, the noted water engineer of New York, says: "It is safe to say that no surface water, derived from a watershed which is populated, OR EVEN UNPOPULATED or practically so, but open to accidental pollution, is entirely safe for drinking purposes as it flows in the stream or lake. The day is not far distant when public sentiment, supported by stringent legislation, will result in the compulsory purification of ALL surface water supplies, used for drinking purposes, by filtration AS IS THE LAW IN GERMANY, or by other efficient means."

A notable case is that of New York City, which derives water from the Catskill mountains, 100 miles distant, but finds it necessary to filter the supply.

In many cities it has required public effort over a period of years to obtain efficient water filtration similar to that rendered by the Oregon Power Company at Albany.
