THE waters still run merrily along just beneath the surface of the little woodland, icebound despite the menace of old Winter's vainglorious display and blow and blister—bend low, friend, and you can hear the rhythmic beating of its heart.

Just beneath the surface here large things are going on—the so-called Mid-Winter dullness is only a myth. Life and activity prevail where you least expect to find it, for this is the get-ready-for-Spring month when all the resources of the store are called upon heavily and persistently to produce and provide for the new season's needs. The source of supply never becomes icebound. No menace of a "dull month" can stop the steady inflow and outgo of merchandise even at the beginning of a New Year when stocks are supposed to be at the lowest ebb.
