Final Account Filed—  
Final account in the estate of Anton Janeski was filed today.

**YAKUTS OF SIBERIA.**  
These People Live in the Coldest Region on Earth.  
The Yakuts are the largest and most cultured of all the primitive races of Siberia. They live in the great province of Yakutsk, a territory five times larger than that of Texas together with all the New England states. The extreme northern part of their country is the coldest region on earth, the temperature falling to 80 and 90 degrees below zero. There the soil is eternally frozen for hundreds of feet below the surface; even at the height of summer only a yard of unfrozen soil veneers the admixture of earth and ice, affording foothold for the gray tundra moss, and occasional patches of grass and dwarf willow.  
The natives live in youtas or semi-underground huts and a few one story log cottages, as do the Russian administrative officials. For ten months the country is a dreary, trackless sea of driven snow, with far lower temperatures than the regions about the north and south poles. During the brief summer thaw of two months the tundra, as the open country is called, is an impassable swamp.  
The Yakuts are the most numerous tribe of eastern Siberia, numbering some 250,000, and are typical representatives of the culture of the Turkish tribes of central Asia. In spite of their present isolation from the other branches of the Turkish race and their probable mixture with Mongols and others, the Yakuts in the course of their migrations have preserved one of the oldest and purest dialects of the language spoken by the Kirghis, the Tartars and other Turkish peoples.—St. Nicholas.

A boy was born to Mrs. G. H. Ray of 125 East Second street, Saturday evening.

**Everybody Can Take Milk.**  
If a person tells me "I cannot take milk" I always say, "You can if you will take it in a certain way." It is a question usually of taking it right or of taking it like soup, with a spoon, with a bite of some carbohydrate substance, cracker or bread, between the sips. I do not think everybody must take milk, but I think everybody can.—Dr. R. C. Cabot in "A Layman's Hand book of Medicine."  
Mount Genevieve.  
From Mount Genevieve, a peak in Gilpin county, Colo., a person can see into five states. On a clear day the observer can discern the Uintah mountains of eastern Utah, the Medicine Bow range of Wyoming, the tips of the Rockies in New Mexico and the principal peaks of Colorado. The plains stretching away to the east are quite plainly visible clear into Nebraska.—Argonaut.  
Dwarf Trees.  
Dwarf trees are suited to small gardens. They occupy little space, are easily cared for, bear sooner than standard kinds, and they are easily shaped into bushes and pyramids or can be used in espalier forms, trained on buildings, fences or trellises.  
Afraid.  
"Yes, I proposed, but she said I'd have to ask her mother first."  
"And did you?"  
"No; I was afraid the mother might accept me."  
Gradual Process.  
She—My dear, can't you manage to raise me a silk dust cloak? He—By degrees, darling. I'll have to begin by raising the dust.—Baltimore American.

**BEGIN SAVING EARLY.**  
Then You Can Pay Your Own Annuity When You Are Old.  
An agent of one of the big insurance companies sends me this about annuities:  
"A man aged forty can deposit with us \$5,025.50 and receive \$350 annually for his lifetime. A woman aged thirty-five on a deposit of \$6,000 can receive \$400 a year.  
"The man's expectation of life is twenty-eight years, the woman's at least eleven."  
Now, \$350 is 5.9 per cent of \$5,025.50, and \$400 is 6.67 per cent of \$6,000. Any company which could make as much as 6 per cent could pay \$350 a year indefinitely, and when the annuity receiver died his original deposit would be intact. The company assumes that not more than 3 per cent can be made on money deposited with it. That explains why only 5.9 per cent is paid annually.  
In theory part of the original deposit is taken annually to supplement interest earnings. If the annuitant lives his expected term of life the principal and interest at 3 per cent will have been paid to him.  
Over a long period of years it is difficult to keep money safely employed and earning over 3 per cent.  
In times like these it is hard to picture the years when capital is a drag on every market and millions are seeking investment in sound bonds at 4 per cent and under. Yet those years will come.  
Every one his own annuity payer—that would be the ideal condition. Begin to save and invest early in your earning life, and when the time arrives to withdraw from the battle you will have both the resources and sufficient knowledge of how to invest them to make it unnecessary to accept the insurance company's offer.—John M. Galsion in Chicago News.
