

AMERICAN PHYSICIANS
FIGHT WORM IN BRAZIL

Rio de Janeiro, July 16.—(U. P.)—Through the efforts of Dr. Charles Seidle, director of the Public Health Department, and Drs. Lewis Wendell Hackett and George Stone of the Rockefeller Foundation, the government has given the American institution free hand to wage a campaign on the "hook worm" in the interior of Brazil.

The percentage of inhabitants of the outlying districts afflicted with this disease is high, according to Health Department officials.

Creditable work has already been done by the American physicians and it is believed the proposed campaign will be of inestimable value in the stimulation of agricultural enterprise.

Advantages of Travel.

All travel has its advantages. If the passenger visits better countries he may learn to improve his own, and if fortunes carries him to worse he may learn to enjoy his own.—Johnson.

Millett's Angelus.

Millett's famous picture, "The Angelus," sold for the munificent sum of \$150,000.

"Along the Road to Tokyo"

THE Ongawa Company in "Along the Road to Tokyo" present at Chautauque a kaleidoscopic view of old Japan. The work of these Japanese artists has the finesse of animated art prints, quaintly knit together in a love story fantasy, accompanied by the lullaby croons and chants of the quaint native music, of Geisha girl and butterfly dances. The play is in characteristic musical setting, given with costuming and scenery of special importation. Mr. Ongawa is the descendant of the famous Samurais of Japan.

TRENCH TALES

"The coolest thing I've seen out there," said a private of Argyle and Sutherland, "was 'the advance had broken into open fighting. Our shells were next to a battalion of the Gordons and I dropped into one of them for a visit. 'There was a Sergeant-Major in the hole, shaving as calmly as if there were no such things as shell flying around. 'Man, Sergeant-major,' I said, 'ye are nae fear?' Says he 'I left my fear by the side of the Lousica.' That's the river that Elgin stands on. And we had a bit of a crack then. He told me he had been an athlete in his day and when he told me his name, I knew him for a man, famous on the Clyde track. We were talking away when suddenly a Boche turned up on the crater lip. How he got there, Heaven only knows, but we were a bit mixed up with the Germans round us near and far. This Boche had an ugly look as if he meant mischief, but it didn't disturb the Sergeant-major much. He just laid down his razor and picked up his rifle and bayonet, and sauntered out with soap down one side of his face. 'The Boche had a bomb in his hand, but he dropped it without drawing the safety pin, and he up with his hands. The Sergeant-major rounded him up into the shell hole, dropping him in by the scruff of his neck. He made the German sold up the mirror till he finished his shave.'"

74-YEAR-OLD INDIAN
WANTS TO SHOOT GERMAN

Washington, July 16.—(U. P.)—Quana Washosha, Comanche Indian, has a medal the Kaiser once gave him for expert marksmanship. This won't keep him from trying some of that shooting ability on the Kaiser's "graybacks," however. The red-skin's American name is Captain Henry B. Hicks. He visited President Wilson and tendered his services to the government. "I'm 74," he said, "but I can shoot as straight as ever."

FRIENDLY WITH SAILORS

Bremerton, Wash., July 16.—There is even a greater spirit of friendliness, a closer comradeship between the people of Bremerton and the enlisted men of the Puget Sound navy yard here today than ever before.

Yesterday the townspeople gave a picnic for the men of the navy yard. The day was spent at a sheltered spot on Dyes inlet with games, athletic events, swimming—and great baskets of lunch furnished by the women of Bremerton.

The entire town and practically all the men stationed at the navy yard turned out to the affair.

EMERGENCY RATIONS.

Food the Soldier Eats When His Regular Supply Fails.

Of the emergency rations of the fighters of the world the most ostentatious is Uncle Sam's ration of compressed maize meal with meat, farina and three chocolate bars. This ration is deficient in fats for the very good reason that, even though hermetically sealed, it would become rancid if it carried any more fat. It is not therefore a balanced ration, but the soldier holds enough actual food to keep a soldier from starving for twenty-four hours.

The British troops as well as the Dutch have a sausage made of ground peas highly salted, reported to have been originated by the Scotch and which is put up in regular sausage skins. It is said to be the most sustaining emergency ration known.

The Italian butter ball is interesting because of the perfect preservation of the unsalted butter within the dry cheese envelope. The compressed tablets of tea make it possible for one to eat his tea if water is not available. The Russians getting what they call a dry cup of tea by slipping a tablet of compressed tea into the mouth and allowing it to dissolve slowly. All sorts of meat and fish are dried in sheets and strips and bunks by the various armies.

These are not the foods, however, upon which armies live, but the emergency rations upon which the soldier depends when the regular rations fail.—Christian Herald.

TESTING THE DENTIST.

Ismael Pasha Didn't Want to Take Any Painful Chances.

To illustrate oriental habits of thought Lord Cromer tells in the Quarterly Review this story of Ismael Pasha, khedive of Egypt. It once happened that Ismael was suffering from toothache. He sent for a European dentist, who told him that he ought to have the tooth out. Ismael said that he was afraid it would be very painful. He was informed in reply that if he would allow the dentist to administer laughing gas to him he would feel nothing. He still doubted, but told the dentist to bring his apparatus to the palace.

The dentist complied and explained the process to the khedive. Ismael then summoned an attendant and told him to send up the sentry who was at his door.

When the man arrived the khedive ordered him to sit down in a chair and requested the dentist to take out a tooth on either side of his jaw. Ismael then asked the man whether he had felt anything, and the man told him that he had not. But Ismael was not yet satisfied. He said that the sentry was a young, strong man and that he would like to see the experiment tried on some one of weaker physique.

Accordingly he summoned a slave girl and had the dentist extract two of her teeth. Finding that she did not show evidence of extreme suffering, he then consented to have his own tooth out.

About the Puritans.

In the American Magazine William Roscoe Thayer says:

"It is the fashion of late to speak condescendingly of the Puritans as of a people of narrow views and of men of sour temperament, but no descendant of theirs and no later immigrant who now dwells in the commonwealth they founded and enjoys the blessings which it bestows upon us will fail to glory in being able to trace back to such forerunners. The story of the conditions which faced the passengers of the Mayflower when they landed at Plymouth can never be too often repeated. To have as founders of our state men and women who 'had the fear of God in their hearts, but feared the face of no man,' ranks as the initial glory of Massachusetts."

Simplest of Cements.

Condensed milk applied to the edges of the pieces of broken china will keep the article as intact as the majority of cements on the market today, writes Edwin W. Ely in a letter to the Electrical Experimenter. Mr. Ely adds that he has mended saucers that have withstood washings in hot water and has mended a telescope lens of fairly large size with this unique cement.

Checking a Skid.

When you are driving an automobile and it begins to skid the skidding will be checked if you will immediately turn the steering wheel in the direction you are skidding. A car skids when there is a momentum tending to turn it about the center of gravity. When the forces about the center of gravity are balanced the car will not skid.—American Boy.

Lead Filled Inscriptions.

In Job xix, 24, is an allusion to the use of lead to fill carved inscriptions upon stone by pouring the molten lead into the cavities of the letters to render them legible and at the same time to preserve them from the action of the weather.

Domestic Jays.

Mrs. Crabshaw—I might have married that man who became a millionaire. Crabshaw—Forget it, my dear. If he'd married you he would be as poor as I am.—Lamb.

Imitation.

"What a wonderful sunset!" "Yes. It actually seems to be trying to look like some of the pictures in the art store."—Washington Star.

Courage consists not in blindly overcoming danger, but in seeing it and conquering it.—Richter.

LESS MEAT IF BACK
AND KIDNEYS HURT

Take a glass of Salts to flush kidneys
if bladder bothers you—Drink
lots of water.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat irritates the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritations.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithium and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it is no longer irritating, thus ending bladder disorders. Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

Electric
Ranges
Are
Clean
Safe
Reliable

"When I get back My Dinner
will be ready to serve"

An Electric Range
Is a Thing of Beauty

Something every woman admires and wants in her kitchen but not for beauty alone.

Because electric ranges employ no open flame for heat—they are clean and safe.

Because they are clean they are sanitary
Because they are not subject to the whims of dampers and drafts and flues they are reliable.

More than all else—modern housewives prefer and use electric ranges because they are economical and produce superior results with less trouble. Ask about the new cooking and heating rate—and decide to take advantage of the low price time-payment offer before it expires.
